**ENVIRONMENTAL HAZARDS**

This product is toxic to bees and highly toxic to mollusks. Do not contaminate water when disposing of equipment washwaters or rinsate.

**DIRECTIONS FOR USE:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**PRODUCT INFORMATION**

**STORED GRAIN:** For protection of stored food, feed and oil grain commodities against injury from insect pests including, but not limited to, lesser grain borer, Indianmeal moth, and angoumois grain moth, rice moth, almond moth, confused flour beetle, and flat grain beetle. Additional pests such as rice weevil, granary weevil, maize weevil, red flour beetle, sawtoothed grain beetle, and rusty grain beetle are suppressed to low levels. Protection is achieved by breaking the pest life cycle through control of adults and/or immature life stages.

For optimum results, thoroughly clean and treat grain storage areas prior to storage of grain. If grain is insect infested, fumigate to control existing populations and apply SECURE™ Dry Insecticide for residual protection.

**STORED SEED USED FOR PLANTING:** This use is restricted to those crops listed on this label, but includes all non-crop seeds including, but not limited to, flower seed, ornamental seed, and grass seed.

SECURE™ Dry Insecticide may also be used in conjunction with registered fungicides or other insecticide seed protectants. Seed treated with other seed protectant products may be required to be colored and tagged. Requirements for coloring and tagging can be found on the product labels. Seed treated with SECURE™ Dry Insecticide alone is considered grain.

**Application Rates:**

**For Crops Typically Treated per 1000 Bushels, See the Following Table:**

Target Crop	SECURE™ Dry per 1000 bushels* (to deliver 1 ppm)
	Pounds
Barley	9.6
Bird seed	See application/ton**
Corn (field, sweet, pop, grown for seed)	11.2
Millet, foxtail	10
Millet, pearl	6.4
Millet, proso	11.2
Oats	6.4
Rice	9.0
Sorghum /Milo	11.2
Triticale	12.0
Wheat	12.0

\*Application rates are based on nominal commodity test weight.

\*\*Ton = U.S. ton (2000 lbs)

**Specific Use Directions:** SECURE™ Dry Insecticide when grain is in the truck or wagon prior to binning. To determine the amount in the truck or wagon, multiply the length by width by depth (all in feet) and multiply this total by 0.8 to get the number of bushels. Measure out the correct amount of SECURE™ Dry Insecticide and spread evenly over the surface of the grain in the truck or wagon. Cut into the grain with a shovel. SECURE Dry will become mixed with grain as it is dumped from the truck or wagon into the hopper. Further mixing will occur when the grain is augered or blown into the bin. Mixing is completed as the SECURE Dry and grain roll down the cone shaped pile in the bin.

**Application per Ton of Grain or Seed:**

For crops typically treated per ton (2000 lbs.), i.e., bird seed or any crop listed in the table above, apply 0.4 lbs. per ton to deliver 1 ppm of active ingredient.

**RECOMMENDATIONS AND RESTRICTIONS:**

- International tolerances and residue limits for crops and commodities treated with this product may not yet be established in one or more countries outside the United States. For this reason, this product should be used only on crops and commodities intended for consumption in the United States or on crops and commodities that will be imported to a country(ies) where you have confirmed the specific import residue policies and applicable residue limits permit such imports.
- Avoid application at extremely dusty sites.
- When drying grain, apply SECURE Dry Insecticide after grain has cooled.
- Do not use a top dressing treatment with a grain mass treatment.
- Do not treat grain more than once.
- Maintain accurate records, especially if commodity is destined for export.

- Calibrate application-equipment and grain flow rates daily and when significant changes occur to ensure proper application rates.
- Always start with clean storage bins that have been treated with a protectant with a different mode of action.
- For resistance management purposes, rotate modes of action yearly.
- No withholding period is required for grain used for food, feed, oil or seed purposes.

### STORAGE AND DISPOSAL

**PROHIBITIONS:** Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Open dumping is prohibited. Do not reuse empty containers.

**STORAGE:** Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers. Store in a cool dry location. Protect from excessive heat.

**PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Completely empty package by shaking and tapping sides and bottom to loosen clinging particles. Then dispose of empty package in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.
