FAMILY TREE

Antibacterial fabric softener eliminates ammonia odor. Gentle sanitary diaper rinse stops growth of germs which may cause diaper rash. Germproofs fabrics.

diasof®

ACTIVE INGREDIENTS:

Methyl dodecylbenzyl trimethyl ammonium chloride 4%

Methyl dodecylxylene bis (trimethyl ammonium chloride) 1%

INERT INGREDIENTS 95%

CAUTION: Keep out of reach of children
See back panel for additional caution.

1 PINT

diasof.

DIASOF is both a bacteriostat and fabric softener. DIASOF aids in preventing diaper rash caused by ammonia producing germs. Provides protection from wash to wash with continuous bacteriostatic action. DIASOF makes diapers and all baby washables lanolin-soft. Stops chafing caused by fabric harshness.

DIRECTIONS

Simply add DIASOF to the final deep rinse. Top loading automatic and wringer machines (8 to 10 lbs.) — 2 capfuls. Front loading automatics (4 to 6 lbs.) — 1 capful.

Hand Laundering — Add one half capful to basin of rinse water (1 to 2 gals). Agitate and soak 8 diapers (or equal) for 5 minutes. Wring and dry.

NOTE: For machines with automatic rinse dispenser, follow manufacturer's directions. For best results do not combine bleach, bluing, soap, detergents, starch or packaged water softeners in same rinse with DIASOF.

CAUTION: Do not apply directly to baby's skin. Keep concentrate away from skin and eyes. Avoid contamination of foods. In case of contact, flush with water. If irritation persists, consult physician.
