

DO-10 B

Calusa DO 10 B is a bacteriostatic self-exhausting dust control oil for use in the laundry wheel. It imparts a residual effect on fabrics to inhibit the growth and spread of disease causing bacteria. It helps reduce contamination in the cloth and aids in sanitary cleaning.

ACTIVE INGREDIENTS

ALKYL DIMETHYL BENZYL AMMONIUM
CHLORIDE

2.00%

(ALKYL IS 40% C-12, 50% C-14 10% C-16)

ORTHO-PHENYLPHENOL

0.03%

DIRECTIONS FOR USE

Fill laundry wheel for souring to a 7" water level at a temperature of 80-100°F. Add sour in normal manner and run five minutes. If sour is not used, uneven exhaustion will result. Next add DO-10 B. For mops, use 4 gallons per 100 lbs. of clean dry weight. For dust tool covers, hand dusters, etc., use 3 gallons. For entrance mats, use 1 gallon. Run a minimum of four minutes on 42" and 44" wheels, seven minutes on 48" to 50" wheels. Without draining, turn on steam and increase temperature to a maximum of 120° F. Six minutes is usually required for complete exhaustion of DO-10 B onto the fabric and the disappearance of the milky dispersion. Extract for a total of two minutes and tumble dry at 180°F.

Do not reuse empty drum or container. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place away from other supplies.
