

REVISED COPY CLOROPOL LABEL

RIGHT PANEL

DIRECTIONS FOR USE

FOR SWIMMING POOLS: For proper disinfection maintain a residual from 0.6 parts per million to 1.00 parts per million. Dosage depends upon existing residual and prevailing weather conditions.

Suggested daily dosage is 2 quarts of CLOROPOL for each 40 thousand gallons. CHECK RESIDUAL WITH TEST KIT one hour after applying. If necessary, adjust dosage. APPLY during cooler daytime hours for most effective results. CLOROPOL can be applied with a water can.

OTHER USES:

GENERAL DISINFECTING: 1 ounce per 2 gallons of water for non-porous surfaces after cleaning. For porous surfaces difficult to clean, use 3 ounces per 2 gallons.

BLEACHING: 1 tablespoon per gallon of water.

REMOVING BATH, KITCHEN STAINS: 3 tablespoons per quart of warm water.
