Stamford, Connecticut

Left Panel

DIRECTIONS

TO CONVERT ONE POUND OF ALGEM CONCENTRATE TO LIQUID ALGEM.

... pour 1 lb. of ALGEM CONCENTRATE into 6 and one-half pints of warm to hot water. Water should be about 100° F. DO NOT USE COLD TAP WATER. ~~SEE~~ Stir constantly until dissolved. Bottle the liquid and use as directed below.

DIRECTIONS FOR USE OF LIQUID ALGEM

For swimming pools use one gallon of liquid ALGEM per 50,000 gallons of water (2 ppm) followed by a weekly maintenance dose of 1 quart of liquid ALGEM per 50,000 gallons of water.

Right Panel

ALGEM CONCENTRATE is a cationic concentrated algaecide.

CAUTION: Do not mix with soap or anionic materials.
ALGEM CONCENTRATE should not come into contact with food products.
Avoid contact with skin and eyes.
Wash off immediately with water.
If irritation persists, get medical attention.
Harmful if swallowed.
Use only as directed.
