Concentrated Dry Pool Chlorine

CARE

ACTIVE INGREDIENTS:
Sodium
dichloro-s-triazinetriene
100%

ALGAEKILLER • BACTERICIDE

PRECAUTION
KEEP AWAY FROM FLAMES, HEATERS, OTHER HEAT SOURCES. Oxidizing material. Contact with combustible matter may cause fire or decomposition. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Decomposes at 350-475° F. with liberation of heat and harmful gases. Do not mix with anything but water. Avoid contact with oil, grease, other combustible matter. Store in cool, dry, well-ventilated area. Keep container tightly closed when not in use. Protect from moisture contamination.

PRECAUTION
DO NOT TAKE INTERNALLY. May be fatal if swallowed. May cause irritation of skin, eyes, nose and throat. Dust may be harmful if inhaled. Avoid contact with skin and eyes. Avoid breathing dust.

ANTIDOTE: External - Flood with water for 15 minutes.
Internal - Drink large quantities of water or milk. Follow with milk of magnesia, vegetable oil or beaten eggs. CALL PHYSICIAN IMMEDIATELY.

IN CASE OF FIRE OR SUSTAINED DECOMPOSITION: If possible, isolate container in open air or well-ventilated area. Flood with large volume of water if necessary.

CONTAINER DISPOSAL: Destroy at safe disposal site or 18 inches below soil surface. Never re-use for food or water.

 100%
 ALGAEKILLER • BACTERICIDE

CARE DIRECTIONS

1. Add CARE at the rate of one ounce per 500 gallons of water to satisfy chlorine demand of water at 0.6 to 1.0 ppm prior to initial conditioning.
2. Add dosage of 1 to 1 1/2 ounces of CARE daily or as needed to maintain available chlorine at 0.6 to 1.0 ppm. Check chlorine and pH with test kit daily. Maintain pH at 7.2 to 7.8. Superchlorinate every week in hot weather (over 80°) and every other week in cooler weather (under 80°). To superchlorinate, add CARE at the rate of 1 ounce per 500 gallons of water. The best time to do this is in the evening. Add directly to skimmer or pre-dissolve as desired.

RECOMMENDED DOSAGE FOR DAILY APPLICATION

Pool Capacity In Gallons	Initial Modern Conditioner Dosage	Normal Daily Dosage of CARE (or as needed to maintain 0.6-1.0 ppm residual chlorine as determined with a test kit)
5,000	1 1/4 pounds	1 1/2 to 2 1/4 ounces
10,000	2 1/2 pounds	1 to 1 1/2 ounces
15,000	3 1/4 pounds	1 1/2 to 2 1/4 ounces
20,000	5 pounds	2 to 3 ounces
25,000	6 1/4 pounds	2 1/2 to 3 1/4 ounces
30,000	7 1/2 pounds	3 to 4 1/2 ounces
35,000	8 3/4 pounds	3 1/2 to 5 1/4 ounces
40,000	10 pounds	4 to 6 ounces

Determine the volume of your pool by following method:

SQUARE OR RECTANGULAR POOLS

Length x Width x Average Depth (all in feet) x 7.5

ROUND POOLS

Diameter x Diameter x Average Depth (all in feet) x 5.9

Does not control acidity. Free
 Chlorine, Standard Chlorine and pH
 tests should be made and pH
 maintained independently at 7.2
 to 7.8.

CARE DIRECTIONS

1. Add CARE at the rate of one ounce per 500 gallons of water to satisfy chlorine demand of water at 0.6 to 1.0 ppm prior to conditioning.
2. Add dosage of 1 to 1½ ounces of CARE daily or as needed to maintain available chlorine at 0.6 to 1.0 ppm. Check chlorine and test kit daily. Maintain pH at 7.2 to 7.8. Superchlorinate even in hot weather (over 80°) and every other week in cooler (under 80°). To superchlorinate, add CARE at the rate of 1 to 500 gallons of water. The best time to do this is in the evening. Add directly to skimmer or pre-dissolve as desired.

RECOMMENDED DOSAGE FOR DAILY APPLICATION

Pool Capacity In Gallons	Initial Modern Conditioner Dosage	Normal Daily of CARE (or as to maintain 0.6 ppm residual as determined test kit)
5,000	1¼ pounds	½ to ¾ ounce
10,000	2½ pounds	1 to 1½ ounce
15,000	3¾ pounds	1½ to 2¼ ounce
20,000	5 pounds	2 to 3 ounce
25,000	6¼ pounds	2½ to 3¾ ounce
30,000	7½ pounds	3 to 4½ ounce
35,000	8¾ pounds	3½ to 5¼ ounce
40,000	10 pounds	4 to 6 ounce

Determine the gallonage of your pool by following:

SQUARE OR RECTANGULAR POOLS.

Length x Width x Average Depth (all in feet) x 7.5

ROUND POOLS:

Diameter x Diameter x Average Depth (all in feet)

Does not control acidity. Alkalinity, Standard Chlorine and pH tests should be made and pH maintained independently at 7.2 to 7.8

NOTE:
