## PIPELINE CLEANING PROCEDURE

1. Rinse thoroughly with water until discharge is clear. Do not recirculate.
2. Wash system for 10 min. at 160° F. minimum water temperature, using 1 oz. of Goal, No. 246, or Dual Drive, No. 247, to each 2 gallons of water.
3. Rinse thoroughly using 1 oz. Protect, No. 235, to each 5 gals. cold water. Circulate for 2 minutes. Open and allow complete system to drain.
4. Sanitize just before each milking using 1 oz. Saniphor, No. 240, to each ten gallons cold water (12.5 ppm titratable iodine.) Drain complete system.

## TABLE OF PROPORTIONS

For 25 ppm\*, (titratable iodine) use 1 oz. SANIPHOR No. 240 to 5 gallons of water. For 12.5 ppm (titratable iodine) use 1 oz. SANIPHOR, No. 240, to 10 gallons water. Use a graduated 1 oz. cup to measure the proper amount of SANIPHOR No. 240.

\*ppm means "parts per million".

Rinse empty container thoroughly with water and discard it.
