NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION
*(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)*

NAME OF PESTICIDE PRODUCT
**Kem Tek Kemex Chlorinating
Granules**

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Chem Lab Products Inc.
5160 E. Airport Drive
Ontario, CA 91761

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Refer to the enclosed Attachment A for the necessary revisions to the Precautionary Statements for the subject product.
2. Under Environmental Hazards revise the first sentence to read: "this pesticide is toxic to fish and aquatic organisms".
3. Under the directions for swimming pools include the statement "Re-entry into treated pools is prohibited above levels of 3 ppm of chlorine".

ATTACHMENT IS APPLICABLE

BEST AVAILABLE COPY

SIGNATURE OF APPROVING OFFICIAL

DATE

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

Submit a revised Confidential Statement of Formula. The nominal concentration of 97% should fall between the upper and lower certified limits, not equal to the lower limit.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Attachment A - Batch 26 Products

Labeling:

1. The signal word is "Danger".

2. The Precautionary Statements should read:

"Corrosive: Cause irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse".

3. The Statements of Practical Treatment should read:

"If in eyes: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention".

"If inhaled: Remove victim to fresh air. If not breathing, give artificial respiration preferably mouth-to-mouth. Get medical attention".

"If on Skin: Wash with plenty of soap and water. Get medical attention if irritation persists".

"If swallowed: Drink promptly large quantities of water. Avoid alcohol. Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage. Get medical attention".

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.
DANGER: Never mix this concentrated chemical with any other substance except generous amounts of water. See **CHEMICAL HAZARDS** elsewhere.

The use of KEMEX Chlorinating Granules also requires the one time use of KEM TEK Chlorine Stabilizer as described in directions under Start Up. This two component system results in a longer-lasting chlorine residual and reduced chlorine consumption. Both products are completely soluble.

START UP: Step 1. Condition pool water with KEM TEK Chlorine Stabilizer as per directions on its label. Thereafter, regular use of KEMEX Chlorinating Granules alone will maintain proper stabilization. **NOTE:** Omit step 1 if pool is already conditioned with a similar stabilizer. Step 2. Concurrently with step 1, superchlorinate water by adding 8 oz. of KEMEX per 10,000 gal. See additional Superchlorination instructions further on.

DAILY CARE: After step 1 and step 2 above, regularly check chlorine residual with a test kit and chlorinate daily or as needed to maintain a 1.0-1.5 ppm residual chlorine. **NOTE:** One ounce of this product per 5,000 gal. of water will increase an existing chlorine residual by 0.9 ppm (1/4 rounded measuring cup = 1 oz.) Broadcast Kemex Chlorinating Granules directly into pool water.

pH: Keep pH of water between 7.2 and 7.6. Use acid to lower pH and KEM TEK Buffered Soda Ash to raise it.

SUPERCHLORINATION: Whenever the pool water loses its sparkle or turns green or the chlorine residual falls rapidly after regular chlorination, superchlorination is recommended. Experience shows that during summer months water should be superchlorinated with 4 oz. of KEMEX per 5,000 gal. every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 2 ppm.

GENERAL: The tables following are a handy reference to average chlorine requirements, but must not be substituted for regular use of a test kit since pools and conditions vary considerably. Test water frequently and chlorinate as needed. Anticipate increased chlorine consumption with increased swimming, hot water or weather, rain and a dirty or neglected pool, etc.

1. TYPICAL DAILY DOSEAGE (SUNNED TIME) ON "POOL" POOLS - 3' to 4' DEEP

Pool Diameter	12ft	15ft	18ft	21ft	24ft
Approx. Gallons	2,500	4,500	7,000	9,000	13,000
Dosage (oz. per day)	1/4 to 1/2	1/2 to 3/4	3/4 to 1	1 to 1 1/4	1 to 2

2. IN-GROUND POOLS - 7' to 8' DEEP

Pool Diameter	14 x 28	15 x 32	17 x 34	18 x 36	20 x 40
Approx. Gallons	15,000	23,000	25,000	31,000	45,000
Dosage (oz. per day)	2 to 3	3 to 4	3 to 5	4 to 6	5 to 7

STORAGE AND DISPOSAL: Keep product in tightly closed container when not in use. Store in a cool dry well ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.

Kemex Chlorinating Granules

Stabilized/Fast Dissolving

NOTE: Do not allow direct contact of this product and the following pool surfaces: vinyl, metallic, fiberglass, painted or colored plaster.

For Control of Bacteria and Algae in swimming pools

ACTIVE INGREDIENT:
 Sodium Dichloro-s-triazinetriene 97%

INERT INGREDIENTS: 3%

AVAILABLE CHLORINE: 62.5%
