KEMTAB - Stabilized Chlorine Tablets
For GROUND-POOL CHLORINATION & ALGAE CONTROL

because it's stabilized to resist sunlight, KEMTAB Chlorine is long-lasting, often for 24 to 48 hours. It is completely soluble, adding no harsh alkali to irritate skin, cloud water or deposit scale on pool walls, heater and filter.

DIRECTIONS: First, condition pool water with KEMTAB Chlorine stabilizer (one treatment at beginning of season only). Thereafter, regular use of KEMTAB will keep water conditioned. Omit KEMTAB if water is already stabilized.

CHLORINATION: Initially treat pool with 4 ounces (16 tablets) per 10,000 gal. of water. Repeat treatment until 1.0 ppm chlorine residual is established. Thereafter, check regularly with test kit (see CHRT) and chlorinate as often as needed to maintain 1.0 ppm minimum chlorine residual. Keep pH between 7.2 and 7.8.

As a guide, tables below show typical daily dosage. Use double the daily amount for every-other-day schedule.

IN GROUND POOLS - DAILY

POOL SIZE	14 x 28	16 x 32	17 x 34	18 x 36	20 x 40
POOL CAP.	15,000	20,000	27,000	50,000	55,000
TABLETS	6 to 8	8 to 12	11 to 16	14 to 18	16 to 22

ABOVE GROUND POOL - DAILY

POOL SIZE	12 ft.	15 ft.	18 ft.	20 ft.	24 ft.
TABLETS	7 to 9	9 to 12	12 to 16	15 to 18	18 to 24

APPLICATION: preferably 1/2 oz. tablet in skimmer with pump running until all tablets are dissolved (about 30 minutes). In dry-solver basket may be used or tablet may be thrown directly into pool. In the latter case, be sure to an obscure 1/2 oz. tablet to measure tablet amount. Dissolve in pan of water first.
