## Net Wt. 300 lbs.

EPA No. 7616-19-AA  
EPA Estab. No. 7616-CA-1

**DIRECTIONS:** KEMEX SUPER 100 Pool chlorine tablets should be used in a pool properly conditioned with KEMGUARD chlorine stabilizer. Use chlorine tablets as needed to maintain a chlorine residual of 1.0 to 1.5 ppm. Average requirement is about 1 tablet per 5,000 gal. of water per week. However, individual pool needs vary depending upon number of swimmers, pool size and type, pool cleanliness, water temperature, etc. Check regularly with pool test kit and chlorinate as per actual need.

**SUPERCHLORINATION.** Start-up: Use 2 to 3 tablets per 5000 gallons of water. During heavy use periods superchlorination is also advisable every 10 to 14 days. Maintain pH of water between 7.2 to 7.6.

**NOTE:** Do not permit tablet or strong effluent from tablets to contact plastic liners, metallic parts or plastered surfaces.

**DANGER:** May be fatal or harmful if swallowed. Causes eye damage. May produce

chemical burns. Do not get in eyes. Avoid prolonged skin contact. Do not breathe dust.

**ENVIRONMENTAL HAZARD:** This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

**DANGER:** Strong oxidizing agent. Use only with large quantities of water. Mixing of tablets with any other materials including other pool chemicals may result in fire or explosion. The tablets may be used in pool water. Avoid heat and moisture. Store in covered container in cool, dry place. Thoroughly rinse empty container with water before discarding.

**FIRST AID:** Internally — feed gruel or cooked cereal, followed by olive oil or cooking oil. Externally or in eyes — immediately flood with cold water for 15 minutes.

# **DRY ALGAECIDE**

**effective against black algae**

KEM TEK DRY ALGAECIDE is a potent algaecide which is effective against all algae when used as directed. It is especially effective against so called "black algae" which appear as spots on the walls and bottom of pools.

## **DIRECTIONS**

1. Check pH of pool. Adjust pH (if necessary) to 7.2-7.6 using a suitable test kit and soda ash or dry acid.
2. Similarly, check available chlorine and adjust (if necessary) to a residual of 1.0 to 1.5 ppm using your regular swimming pool chlorine, be it dry or liquid.
3. Place one tablespoon of granular KEM TEK DRY ALGAECIDE directly on black spots (if on bottom). If the spots are on the walls, use a brush to apply the product.
