

INTRODUCTION

KEM-TEK FEEDER TABLETS-90 are slow dissolving, concentrated chlorine tablets for use in erosion type chlorine tablet feeders.

DIRECTIONS

1. Remove everything from the feeder and rinse thoroughly with fresh water. Never mix KEM-TEK FEEDER TABLETS-90 with any other tablets or any other chemical.
2. Fill the feeder with the tablets.
3. Adjust the feed rate so as to maintain a chlorine residual of 1.0-1.5 ppm. Check the chlorine residual daily with a suitable test kit. Do not use the pool unless the chlorine residual is in the 1.0-1.5 ppm range.
4. Check the pH of the pool water daily, adding KEM DRI ACID[®] or pH BUFFER[®], or equivalent products, as necessary to maintain pH in 7.2-7.6 range.
5. If the pool is not stabilized with KEMGUARD CHLORINE STABILIZER[®] or equivalent, add stabilizer to a concentration of 30 ppm. Consult the label on KEMGUARD Stabilizer or equivalent product for exact instructions.

POOL STARTUP AND HEAVY BATHER LOAD: At the start of the bathing season, in filled pools, upon filling a pool, and after a heavy bathing load, superchlorination is necessary. Superchlorination is the addition of two or three times the normal amount of chlorine to oxidize and remove unwanted organic and inorganic material. The end result is the establishment of a chlorine residual of 1.0-1.5 ppm. A granular chlorine, such as SHOCK or KEMEX, which will dissolve rapidly, should be used for superchlorination. Consult the labels on SHOCK[®] or KEMEX[®] for superchlorination instructions.

KEM-TEK FEEDER TABLETS-90 FOR AUTOMATIC POOL CHLORINATORS

Controls Bacteria and
Algae in Swimming Pools

Active Ingredient:

Trichloro-s-triazinetrione 100%

DANGER:

KEEP OUT OF REACH OF
CHILDREN. SEE FIRST AID
STATEMENT AND OTHER
PRECAUTIONS ON SIDE PANEL.

CHEM LAB PRODUCTS
Anaheim, California 92806

Net Wt. 300 lbs.

EPA Reg. No. 7616-39-AA
EPA Est. No. 7616-1-CA

The pool should not be used during superchlorination until the chlorine residual is less than 2.0 ppm.

NOTE: Do not permit tablets or strong effluent from tablets to contact plastic liners, metallic parts or plastered pool surfaces.

DANGER: Corrosive, causes eye damage, may cause burns on moist or broken skin or on clothing. Do not get in eyes, on skin or clothing. May be harmful or fatal if swallowed. Do not breathe dust. Strong oxidizing agent. Use only with large quantities of water. Mixing of tablets with any other materials including other pool chemicals may result in fire or explosion. Will burn with the evolution of hazardous and irritating chlorine containing gases. Keep away from heat and moisture. Store in covered container in cool, dry place. Thoroughly rinse empty container with water before discarding. In case of fire: If possible isolate container in well-ventilated area and flood with large volumes of water.

*KEM DRI ACID, pH BUFFER, KEMGUARD CHLORINE STABILIZER, SHOCK, and KEMEX are packaged by Chem Lab Products Inc.

FIRST AID: Internally—feed gruel or cooked cereal, followed by olive oil or cooking oil. Externally or in eyes—immediately flood with cold water for 25 minutes.

CALL A PHYSICIAN FOR EYES

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on the label.
