Subject: 3-Inch Chlorinating Tablets
EPA Registration No. 7616-18
1-Inch Chlorinating Tablets
EPA Registration No. 7616-39
Applications Dated November 2, 1989

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comment below. A stamped copy of each product's label is enclosed for your records. Five copies of each product's finished labeling must be submitted before either product is released for shipment.

To your Pesticide Disposal/Storage and Disposal section, add the statement, "Do not contaminate water, food, or feed by storage or disposal."

Your Confidential Statements of Formula (CSF) are on obsolete CSF forms. To update our records, please fill out and return CSF forms (enclosed) for both products.

If you have any questions, you may call Wallace Powell at (703) 557-6938.

Sincerely,

Walter C. Francis
Acting Product Manager (32)
Antimicrobial Program Branch
Registration Division (H-7504C)

stablized • slow dissolving feeder tablets for automatic chlorinators

For control of bacteria and algae
in swimming pools.

ACTIVE INGREDIENT:
Trichloro-s-triazinones ... 98.0%
INERT INGREDIENTS 1.0%
AVAILABLE CHLORINE 99%

NET WT.
4 LBS.
(1.81 kg.)

KEEP OUT OF REACH OF CHILDREN

DANGER

See first aid statement and other
precautions on back panel.

PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED, drink promptly a large quantity of water. **DO NOT** induce vomiting. **NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON.** Avoid alcohol. Get medical attention.

IF IN EYES, flush with plenty of water for 15 minutes. Get medical attention.

IF ON SKIN, immediately brush off excess chemical and flush with plenty of soap and water. Remove contaminated clothing. Wash clothing before reuse. Get medical attention if irritation persists.

IF INHALED, remove person to fresh air. Get medical attention.

NOTE TO PHYSICIAN: Probable minimal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

IRRITATIVE. CAUSES EYE AND SKIN DAMAGE. IRRITATING TO NOSE AND THROAT. DANGEROUS TO FISH IF SWALLOWED. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES.

Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust or fumes. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARD

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES Permit. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER RAPIDLY LIBERATES IRRITATING AND DANGEROUS CHLORINE-CONTAINING GASES. RECOMPOSES AT 440°F. to 480°F. WITH LIBERATION OF HARMFUL GASES.

Use only with water. Do not use dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Combination with acetone, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

IN CASE OF FIRE, if possible isolate container in open air or well ventilated area. Flood with large volume of water.

IN CASE OF CONTAMINATION OR DECOMPOSITION, do not reuse container.

DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

KEM TEK 1" CHLORINATING TABLETS are slow dissolving, concentrated chlorinating tablets for use in ocean-type feeders.

1. Remove everything from the feeder and rinse thoroughly with fresh water. **Never mix KEM TEK 1" CHLORINATING TABLETS** with any other tablets or any other chemical.

2. Fill the feeder with the tablets.

3. Adjust the feed rate so as to maintain a chlorine residual of 1.0-1.5 ppm.

4. Check the pH of the pool water daily, adding **KEM TEK DRY POOL ACID** or **BUFFERED SODA ASH**, or equivalent products, as necessary to maintain pH in 7.2-7.6 range.

5. If the pool is not stabilized with **KEM TEK CHLORINE STABILIZER** or equivalent, add stabilizer to a concentration of 30 ppm. Consult the label on **KEM TEK CHLORINE STABILIZER** or equivalent product for exact instructions.

POOL STARTUP AND HEAVY BATHER LOAD: At the start of the bathing season, in lined pools, upon filling a pool, and after heavy bathing load, superchlorination is necessary. Superchlorination is the addition of two or three times the normal amount of chlorine to oxidize and remove unwanted organic and inorganic material. The end result is the establishment of a chlorine residual of 1.0-1.5 ppm. A granular chlorinating agent, such as **SHOCK** or **KEMEX**, which will dissolve rapidly, should be used for superchlorination. Consult the labels on **SHOCK** or **KEMEX** for superchlorination instructions. The pool should not be used during superchlorination until the chlorine residual is less than 2.0 ppm.

NOTE: Do not permit tablets or strong effluent from tablets to contact plastic linings, metallic parts or plastered pool surfaces.

***KEM TEK DRY POOL ACID, BUFFERED SODA ASH, CHLORINE STABILIZER, SHOCK AND KEMEX are packaged by Chem Lab Products Inc.**

For use in CH-12 chlorinator for sanitary treatment effluents discharged from the Microphor® sewage treatment unit.

Fill the chlorinator with tablets. Maintain a 30-day inventory of tablets. Inspect and refill schedule to keep the chlorinator at least half (1/2) full of tablets at all times.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or empty container is a violation of federal law. If these wastes cannot be disposed of by the manufacturer, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container until ready to use. Store in cool, dry, well ventilated area away from heat or open flame. In case of decomposition inside container in open area if possible, and flood with large volume of water. Do not reuse empty container. Rinse empty container thoroughly with water, detach all material before discarding. Place in trash collection or dispose in approved landfill area.
