

KEM TEK

1" Chlorinating Tablets

stablized • slow dissolving

feeder tablets for automatic chlorinators

<p>For control of bacteria and algae in swimming pools</p> <p>ACTIVE INGREDIENT Trichloro-s-triazinone 99.0%</p> <p>INERT INGREDIENTS 1.0%</p> <p>AVAILABLE CHLORINE 88%</p>	<p>NET WT. 4 LBS. (1.81 kg.)</p>	<p>KEEP OUT OF REACH OF CHILDREN</p> <p>DANGER</p> <p>See first aid statement on label for precautions on back panel</p>
---	---	--

PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED, drink promptly a large quantity of water. DO NOT induce vomiting. NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. Avoid alcohol. Get medical attention.

IF IN EYES, flush with plenty of water for 15 minutes. Get medical attention.

IF ON SKIN, immediately brush off excess chemical and flush with plenty of soap and water. Remove contaminated clothing. Wash clothing before reuse. Get medical attention if irritation persists.

IF INHALED, remove person to fresh air. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of nitric oxide therapy.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER

CORROSIVE. CAUSES EYE AND SKIN DAMAGE. IRRITATING TO NOSE AND THROAT. HARMFUL, OR FATAL IF SWALLOWED. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES.

Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust or fumes. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARD

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES Permit. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE-CONTAINING GASES. DECOMPOSES AT 460°F TO 480°F WITH LIBERATION OF HARMFUL GASES.

Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Consumption with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

IN CASE OF FIRE, if possible isolate container in open air or well ventilated area. Flood with large volume of water.

IN CASE OF CONTAMINATION OR DECOMPOSITION, do not reuse container.

CHEM LAB PRODUCTS, INC.

DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling. KEM TEK 1" CHLORINATING TABLETS are slow dissolving, concentration tablets for use in erosion type feeders.

1. Remove everything from the feeder and rinse thoroughly with fresh water. Never mix KEM TEK 1" CHLORINATING TABLETS with any other tablets or any other chemical.
2. Fill the feeder with the tablets.
3. Adjust the feed rate so as to maintain a chlorine residual of 1.0-1.5 ppm.
4. Check the pH of the pool water daily, adding KEM TEK DRY POOL ACID* or BUFFERED SODA ASH* or equivalent products as necessary to maintain pH in 7.2-7.6 range.
5. If the pool is not stabilized with KEM TEK CHLORINE STABILIZER* or equivalent, add stabilizer to a concentration of 30 ppm. Consult the label on KEM TEK CHLORINE STABILIZER or equivalent product for exact instructions.

POOL STARTUP AND HEAVY BATHER LOAD: At the start of the bathing season, in filled pools upon filling a pool, and after heavy bathing load, superchlorination is necessary. Superchlorination is the addition of two or three times the normal amount of chlorine to oxidize and remove unwanted organic and inorganic material. The end result is the establishment of a chlorine residual of 10-15 ppm. A granular chlorinated agent, such as SHOCK* or REMEX* which will dissolve rapidly should be used for superchlorination. Consult the labels of SHOCK* or REMEX* for superchlorination instructions. The pool should not be used during superchlorination until the chlorine residual is less than 2.0 ppm.

*KEM TEK DRY POOL ACID, BUFFERED SODA ASH, CHLORINE STABILIZER, SHOCK AND REMEX are packaged by Chem Lab Products, Inc.

For use in CH-12 chlorinator for sanitary treatment of effluent discharged from the Microphor® sewage treatment unit.

1. Fill the chlorinator with tablets. Maintain a 30-day (or more often if necessary) inspection and refill schedule to keep the chlorinator at least half (1/2) full of tablets at all times.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container in open area if possible, and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material left in container. Place in trash collection or dispose in approved landfill area. Do not contaminate water, food, or feed by storage or disposal.
