ISOCYANURATE RED ATTACHEMENT A

LABELING: (Statements are based on review of referenced acute toxicity data)

1. The signal word is "DANGER"
2. Revise the Precautionary Statements to read:

CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

3. Revise the Statement of Practical Treatment to read:

STATEMENT OF PRACTICAL TREATMENT.

IF SWALLOWED: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

ACCEPTED
with COMMENTS
in EPA Letter Dated:

Under the Federal Insecticide,
Fungicide, and Rodenticide Act as
amended, for the pesticide
registered under EPA Reg. No.

7616-39

DIRECTIONS FOR USE

This is a listing of Federal Law. Use this product in a manner
conformant with the listing.
KEM TEK 1" CHLORINATING TABLETS are slow dissolving
chlorinating tablets for use in automatic feeders.
1. Remove everything from feeder and rinse thoroughly with fresh
water. Measure KEM TEK 1" CHLORINATING TABLETS with any
other tablets or any other chemicals.
2. Fill the feeder with the tablets.
3. Adjust the feed rate so as to maintain a chlorine residual of
1.0-1.5 ppm.
4. Check the pH of the pool water daily, adding KEM TEK DRY
POOL ACID or BUFFERED SODA ASH or equivalent products as
necessary to maintain pH in 7.2-7.6 range.
5. If the pool is not stabilized with KEM TEK CHLORINE
STABILIZER or equivalent, add stabilizer to a concentration of 30
ppm. Consult the label on KEM TEK CHLORINE STABILIZER or
equivalent product for exact instructions.

POOL STARTUP AND HEAVY BATHER LOAD: At the start of the
bathing season in filled pools, upon filling a pool, and after a
heavy bathing load, superchlorination is necessary.
Superchlorination is the addition of two or three times the normal
amount of chlorine to oxidize and remove unwanted organic and
inorganic material. The end result is the establishment of a
chlorine residual of 1.0-1.5 ppm. A granular chlorinating agent,
such as SHOCK or KEMEK which will dissolve rapidly, should be
used for superchlorination. Consult the labels on SHOCK or
KEMEK for exact instructions. The pool should not be
used during superchlorination until the chlorine residual is less
than 0.5 ppm.

KEM TEK DRY POOL ACID, BUFFERED SODA ASH, CHLORINE
STABILIZER, SHOCK, and KEMEK are packaged by Chem Lab
Products, Inc.

STORAGE AND DISPOSAL: Keep product in tightly closed
containers when not in use. Store in a cool, dry, well ventilated
area away from heat or open flame. In case of decomposition
or spillage, wear eye protection, goggles and flush with large
amounts of water. Do not reuse empty container. Rinse empty
containers thoroughly with water to dissolve all material before
recycling, reuse, or flush or dispose in approved
manner.

PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Drink plenty of water. DO NOT induce vomiting. NEVER GIVE ANYTHING BY MOUTH TO AN
UNCONSCIOUS PERSON. Avoid a drink. Get medical attention.
IF IN EYES: Flush with plenty of water for 15 minutes. Get medical
attention.
IF ON SKIN: Immediately brush off excess chemical and flush
with plenty of water. Remove contaminated clothing.
Wash thoroughly before reuse. Get medical attention if irritation
persists.
IF INHALED: Remove person to fresh air. Get medical attention.
NOTE TO PHYSICIAN: Product is corrosive. Damage may
occur to the respiratory tract.
