 Ontario, CA 91761

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Refer to the enclosed Isocyanurate RED Attachment A for the necessary revisions to the Precautionary Statements of the subject product label.
2. On the submitted CSF, the nominal concentration of 99% should fall between the upper and lower certified limits, not equal to the lower limit. Please revise the lower limit to 98% so that the label does not have to be changed.

A stamped copy of the product label is enclosed for your records.

APPROVED FOR PUBLICATION

2/4

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

DIRECTIONS

It is a violation of federal law to use this product in violation of the label directions.

CARTRIDGE USE: Fit threaded end of cartridge into feeder. The desired feed rate number on cartridge side is shown in table. Do not use in small 12-inch float.) If desired, use a chlorine test kit to check chlorine level.

CHLORINATION: If chlorine reading is below 1.0 ppm, add 1.0 to 1.5 ppm reading is established or hand chlorine residual. Then set feeder as shown in table. This is a trial setting. If chlorine level is found that maintains chlorine between 1.0 to 1.5 ppm. If chlorine level is heavy use, increase feed rate and/or superchlorinate manually with bleach. Keep pH between 7.2 and 7.8. This feeder dispenses chlorine and normally requires acid for pH regulation, it will substantially aid in pH regulation. If you do not need acid for pH regulation, you must add 1 lb. of Buffered Soda Ash to each 2 lb. cartridge is started (1/2 lb. for a fresh 2 pound cartridge.)
