TERM OF ISSUANCE

NOTICE OF PESTICIDE: ☒ REGISTRATION  
☐ REREISTRATION

(Under the Federal Insecticide, Fungicide,  
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Kem Tek Spa Kem Brominating  
Tablets

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Chem Lab Products, Inc.  
5160 E. Airport Drive  
Ontario, CA 91761

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/re-registration of your product under FIFRA section 3(c)(5) and section 4 when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase, "EPA Registration No. 7616-66" to your label before you release the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

DATE

A stamped copy of the label is enclosed for your records.

Sincerely yours,

A handwritten signature in cursive script, appearing to read 'Ruth Douglas'.

## Slow Dissolving BROMINATING TABLETS

Re-fill Tablets for BROMI-BUOY™  
Heat stabilized - long lasting  
For spa disinfection and  
algae prevention

### ACTIVE INGREDIENTS:

1-Bromo-3-chloro-5, dimethylhydantoin	60.0%
1, 3-dichloro-5dimethylhydantoin	27.4%
1, 3-dichloro-5-ethyl-5-methylhydantoin	10.6%

### INERT INGREDIENTS

Available Bromine	2.0%
Available Chlorine	39.2%
	44.4%

KEEP OUT OF REACH OF CHILDREN

## DANGER

PRODUCT #267

UPC HERE

**DANGER:** Do not mix this product in concentrated form with any other chemicals. Do not add other chemicals to the feeding device when using this product. A violent reaction leading to fire and/or explosion could result.

### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Bromine tablets are an effective sanitizer and disinfectant of spa and hot tub water. When placed in a feeder that is adjusted to maintain a residual of 2 - 4 ppm bromine in residential spas, these concentrated, slow-dissolving tablets will keep water clean and free of odors. Testing for residual should be performed using a reliable test kit, available at Kem Tek retailers. Feeder may be adjusted by the number of tablets inside (approx. 3 tablets per 100 gallons of water) or if provided, by adjusting the setting per manufacturers instructions.

### Spa Start-Up

Fill spa with fresh water. If stain causing metals such as iron and copper are known to be present, treat with a suitable product such as Kem Tek's *Spa Kem Stain and Scale Inhibitor*. Test for Total Alkalinity and adjust if necessary. Test pH and adjust to 7.2 - 7.6 as needed. Use a product such as Kem Tek's *Spa Kem pH Minus* to lower pH, or *pH Plus* to raise pH. Shock or super-chlorinate water using a fast acting chlorinating product such as Kem Tek's *Spa Kem Chlorinating Granules* or *Liquid Shock*, using an amount sufficient to produce a 5 ppm chlorine (or 10 ppm bromine) residual. Follow product instructions for proper dosage. Place brominating tablets into feeder. Adjust feeder, or amount of tablets, to maintain a bromine residual of 2 - 4 ppm. Use a reliable test kit to test for bromine residual. Replenish tablets as they are consumed. Operate circulation/filtration system at least 3 hours daily to maintain clean and clear water. Do not heat water above 104°F.

### Routine Spa Maintenance

Because use, exposure to sunlight and depletion of feeders can cause bromine residual to drop below the recommended 2 - 4 ppm, the water needs to be periodically "shocked" or super-chlorinated. This should be done at least weekly or after each use to prevent growth from occurring which can otherwise cause excess chemical consumption (or persistently low bromine readings), as well as unsightly or cloudy water which is unsuitable for bather use. See "Shocking" instructions under "Spa Start-up". Residential spas should be drained and refilled with fresh water every 60 days or more frequently depending on use.

### KEEP CONTAINER TIGHTLY CLOSED

### STORE IN A COOL DRY PLACE

DO NOT STORE AT ELEVATED TEMPERATURES

### STORAGE AND DISPOSAL

Keep product dry in tightly closed original container when not in use. Store in a cool, dry, well ventilated area away from heat, open flames, sunlight and other chemicals. Do not reuse empty container. Rinse empty container thoroughly with water and discard in trash. Do not contaminate water, food or feed by storage or disposal. Store in a well ventilated area away from heat or open flame. Open dumping is prohibited. Do not reuse empty container. In case of decomposition, isolate container. If possible, and flood with large amounts of water to dissolve all material before discarding. Pesticide or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides.
