ALGY COP does an effective job of controlling green, blue-green and mustard colored algae growth in swimming pools For black algae problems, the use of KEM TEK BLACK ALGAE TREATMENT is recommended Follow all precautions, directions and restrictions per their labeling for all pesticide products being used

- 1) Adjust pH of pool water to 7.2-7.6 Use KEM TEK pH PLUS (soda ash) to raise pH and KEM TEK MURIATIC ACID to lower it Follow the instructions on the back panel of whichever product is used

- 2) Add 1 pound of KEM TEK SHOCK QUICK, or 3 quarts of KEM TEK KEMKLOR II CHLORINATING LIQUID per 10,000 gallons of pool water to oxidize water soluble wastes Allow to circulate one hour (Note Do not enter the pool until chlorine residual drops to 2.0 ppm)
- 3) Add 10 oz of ALGY COP per 10,000 gallons of pool water Preferably, dilute the concentrate into one or two gallons of water and apply to the deep end of the pool
Using an algae brush, brush algae spots prior to product application Brush daily for the next days if necessary to promote penetration of product into algae spots to improve effectiveness
- 4) Filter continuously for 24 hours
Check available chlorine, if necessary adjust to 3 ppm minimum Dead algae may be visible as a gray or white cloudiness Living algae will have a green, brown, yellow or black color If algae has color after 24 hours, repeat treatment as necessary for removal
- 5) Remove dead algae by brushing and vacuuming as needed
Once algae is dead, turn off filter system (including timer) allow 18 to 24 hours for dead algae to settle to the bottom of the pool
