

UV PROTECTED (STABILIZED) For Longer Lasting Chlorination!

KEM TEK

Lasts Up To 3 Times Longer Than Unstabilized Granules!

Kem tek™ ALL-IN-ONE CHLORINATING GRANULES

Fast Acting For Daily & Super Chlorination To Control Bacteria & Algae

KEEP OUT OF REACH OF CHILDREN NO SE DEBE AL ALCANCE DE LOS NIÑOS

DANGER PELIGRO

See each packet for first aid, treatment, and other precautions

ACTIVE INGREDIENTS
Sodium Dichloro-s-triazinetrione-Dihydrate... 39.0%

INERT INGREDIENTS... 1.0%

AVAILABLE CHLORINE... 58.0%

pH BALANCED WON'T CLOUD WATER NO RESIDUE

OK PLASTER/QUINTE FIBERGLASS POOL

SEE NOTE ABOVE/IN-GROUND VINYL POOL

NOTE: Do not allow direct contact of this product on the following pool surfaces: vinyl, enamel, fibreglass, painted or colored plastic. Product will bleach color out. To use product safely, read and follow all instructions on the back label.

Net Wt. 4 lbs. (1.81 Kg)

for ALL SWIMMING POOLS

Made in USA

PHYSICAL OR CHEMICAL HAZARD
STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE CONTAINING GASES. DECOMPOSES AT 460°F TO 480°F WITH THE LIBERATION OF HARMFUL GASES. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to a fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. **IN CASE OF FIRE,** if possible, isolate container in open air or well ventilated area. Flood with large volume of water. **IN CASE OF CONTAMINATION,** do not reseal container.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. **ATTENTION:** Never mix this concentrated chemical with any other substance except as directed. Use only the amounts of water. See **CHEMICAL HAZARDS** on this label.

The use of **ALL-IN-ONE CHLORINATING GRANULES** also requires the one time use of Kem Tek™ **STABILIZER CONDITIONER** as described in the directions below under Start Up. This two-component system results in a long-lasting chlorine residual and reduced chlorine consumption. Both products are completely soluble.

VINYL LINED POOL CARE: Vinyl lined are easily damaged by chemicals used to treat and maintain pools. **ALL-IN-ONE CHLORINATING GRANULES** are well suited for use in these pools, especially the above ground type which have only 3-4 foot depths and are not equipped with a bottom drain. **ALL-IN-ONE** dissolves rapidly and completely (its easily pre-dissolved in a bucket of water to help avoid potential problems), so direct contact with liner is reduced and there are no residues to be swept or vacuumed from the bottom. **ALL-IN-ONE** also simplifies pH control because it is pH neutral compared to other chlorinating products containing calcium hypochlorite, sodium hypochlorite, and trichloro isocyanuric acid (this is particularly important when using sodium bisulfate or dry acid to adjust pH because of its insoluble crystal-forming reaction with calcium hypochlorite). **ALL-IN-ONE** is not sensitive to the pH of the water and will not cloud water even when shocking or superchlorinating as often occurs with calcium hypochlorite. **START UP** Step 1 Condition pool water with Kem Tek™ **STABILIZER-CONDITIONER** as per directions on the label. Thereafter, regular use of **ALL-IN-ONE** alone will maintain proper stabilization. **NOTE:** Omit Step 1 if pool is already conditioned with a similar stabilizer. Step 2. Concurrently with Step 1, superchlorinate water by adding 12 oz of **ALL-IN-ONE** per 10,000 gallons of pool water. See additional superchlorination instructions below.

MAINTENANCE CARE: After Step 1 and 2 above, regularly check chlorine residual with a test kit and maintain daily or as needed to maintain 1.0 to 1.5 ppm residual chlorine. **NOTE:** One ounce of this product per 5,000 gallons of pool water will increase an existing chlorine residual by 0.8 ppm (1/8 rounded measuring cup + 1 oz). Broadcast **ALL-IN-ONE** directly into the pool water. Keep pH of the water between 7.2 and 7.6. Use acid to lower pH and Kem Tek™ pH Plus to (Buffered Soda Ash) to raise it.

SUPERCHLORINATION: Whenever the pool water loses its sparkle or turns green or the chlorine residual falls rapidly after regular chlorination, superchlorination is recommended. Experience shows that during the summer months, water should be superchlorinated with 6 oz of **ALL-IN-ONE** per 5,000 gallons of pool water every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 3ppm

GENERAL The following tables are a handy reference to average chlorine requirements, but must not be substituted for regular use of a test kit since pools and conditions vary considerably. Test water frequently and chlorine as needed. Anticipate an increased chlorine consumption with increased swimming, hot water or weather, rain, a dirty or neglected pool, etc.

TYPICAL DAILY DOSAGE (SUMMERTIME)

After Steps 1 & 2 above

Above-Ground Pools—7' to 4' DEEP

Pool Diameter	12 Ft.	15 Ft.	18 Ft.	20 Ft.	24 Ft.
Approx Gallons	2,500	4,500	7,000	9,000	13,000
Dosage (ounces)	1/4-1	1/2-2	2-3	3-4	4-5

In-Ground Pools—7' to 1' DEEP

Pool Size (Feet)	14x28	16x32	7x34	18x36	20x40
Approx Gallons	15,000	20,000	15,000	30,000	35,000
Dosage (ounces)	5-6	6-7	7-8	8-9	9-10

1) FOR CONTROL OF BACTERIA AND ALGAE (OUTDOORS) IN SPAS Before bathing, test water pH, chlorine residual and alkalinity using a suitable test kit. Adjust chlorine residual to 3.0 ppm. After bathing, superchlorinate to 5.0 ppm (1 level table-spoon per 500 gallons of water). Use a chlorine stabilizer especially outdoors to prolong chlorine residual. Maintain

- pH of water between 7.2 and 7.6 and total alkalinity between 125 and 175 ppm with SPA KEM™ pH PLUS (+) or SPA KEM™ pH MINUS (-).
- 2) This product does not affect pH or alkalinity of water. One tenth oz. (1/4 tsp.) per 500 gal. of water gives 0.8 ppm and 1 level tbsp. Gives 5 ppm of chlorine. To use, broadcast granules into water with jets running. Bathing can start at once.
- 3) With bathers in a 500 gal. spa a 2.0 ppm chlorine residual can drop below the minimum 1.0 ppm in 15 to 20 minutes. Less water or more bathers will accelerate loss. Test often and keep chlorine residual above 1.0 ppm
- 4) Weekly, superchlorinate water to 5 or 6 ppm (see 2 above). Re-entry into spas is prohibited above levels of 3 ppm of chlorine. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage or chlorine stabilizer goes over 100 ppm as measured with a suitable cyanuric acid test kit. Avoid use of products such as body lotion that consume chlorine.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTICATED ANIMALS

DANGER: CORROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

FIRST AID

If Swallowed	Call a poison control center or doctor immediately for treatment advice. Promptly drink large quantity of water if able to swallow. DO NOT induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
If In Eyes	Hold eye open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If On Skin or Clothing	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If Inhaled	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic organisms.

STORAGE AND DISPOSAL

STORAGE: Keep product in tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. **DISPOSAL:** If empty, do not reuse container. Place in trash or offer for recycling if available. If partially full, contact your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
