NOTIFICATION
Date Reviewed: 4/28/14

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

The presence of algae in swimming pools is objectionable and can be difficult to remove. KEM TEK™ ALGAEICIDE 60% CONCENTRATED helps prevent the growth of chlorine-resistant algae, (such as mustard and black algae). It also acts as an added defense against algae due to low chlorination periods. Once started, algae greatly increases chlorine demand and the associated increased cost.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR USE:

Freshly Filled And/Or Algae-Free Swimming Pools: Add 8 ounces of KEM-TEK ALGAEICIDE 60% CONCENTRATED per 10,000 gallons pool water. Add 2 to 4 ounces (per 10,000 gallons) weekly as a maintenance dose to prevent algae growth through the swimming season.

Visible Algae Growth: Super-chlorinate with a fast-acting, chlorinating product (such as SHOCK QUICK™) to a chlorine reading of 5 ppm. Do not use the pool until the chlorine residual has dropped to 3 ppm. Remove all debris by vacuuming or sweeping and filtering. In order to aid in the removal of the fine particles resulting from the affected algae, the use of KEM-TEK ULTRA CLARIFIER is recommended. Add an initial dose of 16 ounces of KEM-TEK ALGAEICIDE 60% CONCENTRATED per 10,000 gallons of water to rid the water of the remaining chlorine-resistant algae. Thereafter, add 2 to 4 ounces (per 10,000 gallons) weekly during swimming season to prevent regrowth of algae.

NOTE: In order to ensure maximum effectiveness of KEM-TEK ALGAEICIDE 60% CONCENTRATED (and all other swimming pool chemicals), always maintain pH at 7.2 to 7.6 and a free-chlorine residual of 1 to 2 ppm. Measure by using a reliable test kit.
