- Step (insert number or letter)
- Suitable for All [Pools] [Pool Surfaces] [Salt Water Pools]
- Swim in just 15 Minutes
- Treats Algae and Prevents Regrowth
- Use Weekly for Prevention

Pool may be used in 15 minutes after adding this product only when chlorine level is at or below 3 ppm

The presence of algae in swimming pools is objectionable and can be difficult to remove KEM TEK™ ALGAECIDE helps prevent the growth of chlorine resistant algae (such as mustard and black algae) It also acts as an added defense against algae due to low chlorination periods Once started algae greatly increases chlorine demand and the associated increased cost

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling

Freshly filled And/Or Algae Free Swimming Pools Add 8 ounces of KEM TEK™ ALGAECIDE per 10 000 gallons pool water Add 2 to 4 ounces (per 10 000 gallons) weekly as a maintenance dose to prevent algae growth through the swimming season

Visible Algae Growth Super chlorinate with a fast acting [unstabilized] chlorinating product (such as Shock Quick™) to a chlorine reading of 5 ppm Do not use the pool until the chlorine residual has dropped to 3 ppm Remove all debris by vacuuming or sweeping and filtering In order to aid in the removal of the fine particles resulting from the affected algae the use of KEM TEK™ ULTRA CLARIFIER is recommended Add an initial dose of 16 ounces of KEM TEK™ ALGAECIDE per 10 000 gallons of water to rid the water of the remaining chlorine resistant algae Thereafter add 2 to 4 ounces (per 10 000 gallons) weekly during swimming season to prevent regrowth of algae

NOTE In order to ensure maximum effectiveness of KEM TEK™ ALGAECIDE (and all other swimming pool chemicals) always maintain pH at 7.2 to 7.6 and a free chlorine residual of 1 to 2 ppm Measure by using a reliable test kit
