

SEP 26 2003

Ms. Dana Wm. Somesla  
Chem Lab Products, Inc.  
5160 East Airport Drive  
Ontario, CA 91761

Subject: Shock Power  
EPA Registration Number 7616-75  
Application Date: June 27, 2003  
Receipt Date: July 1, 2003

Dear Ms. Somesla:

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable with the conditions listed below:

- To update the "First Aid" statement in accordance with PR Notice 2001-1
- To update the "Storage and Disposal" statement in accordance with PR Notice 2001-6
- To update the "Environmental Hazards" statement in accordance with PR notices 93-10 and 95-1
- Add the statement "Do Not Pre-Dissolve in Container (i.e., bucket) Before Applying"

**Conditions**

1. In the proposed label, place the "available chlorine" statement underneath the ingredient statement.

2. Align the "Ingredient" Statement to read:

ACTIVE INGREDIENT	
Trichloro-s-Triazinetrione .....	40.0%
INERT INGREDIENTS .....	60.0%
TOTAL	100.0%

3. You must provide a "Hotline Telephone Number" under the First Aid Statement as per PR Notice 2001-1.

4. Under the "Environmental Hazards" statement change "This product is toxic to fish" to read: "This pesticide is toxic to fish and aquatic organisms".

**CONCURRENCES**

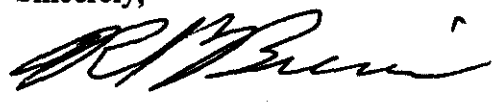

SYMBOL							
SURNAME							
DATE							

**General Comments**

A stamped copy of the accepted labeling is enclosed. Submit three (3) copies of your final printed labeling before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please contact Delores Williams at (703) 308-6372.

Sincerely,

Robert S. Brennis  
Product Manager 32  
Regulatory Management Branch II  
Antimicrobials Division (7510C)

# SHOCK POWER™ SWIMMING POOL WATER DISINFECTANT

SWIM AFTER USE - USE WEEKLY  
HELPS MAINTAIN BALANCED pH  
DISSOLVES QUICKLY AND ACTS FAST

1 LB. TREATS 12,000 GALLONS  
REDUCES CHEMICAL NEEDS-IT'S STABILIZED  
QUICK CHLORINE BOOST

CLARIFIES BY REMOVING ORGANIC MATTER AND SWIMMER WASTE\*  
CONTROLS ALGAE AND BACTERIA\*

ACTIVE TRICHLORINATED  
INERT INGREDIENTS  
TOTAL

KEEP OUT OF REACH CHILDREN  
NO SE DEJE AL ALCANCE DE LOS NIÑOS

**DANGER**  
**PELIGRO**

SEE BACK PANEL FOR FIRST AID STATEMENT  
AND OTHER PRECAUTIONS

\*DURING SUPER CHLORINATION

AVAILABLE CHLORINE...36.0%

## The SHOCK POWER Advantages:

This special blend of ingredients (patent pending) does it all. SHOCK POWER works fast allowing swimmers back into the pool in just 15 minutes. This is a premium grade shock product, so it takes only one pound of SHOCK POWER to treat 12,000 gallons of pool water.

SHOCK POWER can be added directly into the water without pre-dissolving and it is ideal for all types of swimming pools. It destroys swimmer wastes and other impurities that cause cloudy water. SHOCK POWER dissolves faster than ordinary shock products without leaving residue. It does not increase the pH of the pool water or contain calcium that causes scale build-up.

**DO NOT PRE-DISSOLVE IN CONTAINER (ie. bucket) BEFORE APPLYING.**

### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**START UP:** Step 1. Condition pool water with cyanuric acid (KEM TEK STABILIZER - CONDITIONER) as per directions on the label. Thereafter, regular use of SHOCK POWER alone will maintain proper stabilization. **NOTE:** Omit Step 1 if pool is already conditioned with similar stabilizer. Step 2. Concurrently with Step 1, initially treat water by adding 1 lb of SHOCK POWER per 10,000 gallons of pool water.

**DAILY USE:** After steps 1 and 2, regularly check chlorine residual with a test kit and chlorinate daily or as needed to maintain 1.0 to 1.5 ppm residual chlorine. **NOTE:** Two ounces of this compound per 5,000 gallons of pool water will increase an existing chlorine level by 1.0 ppm (1/8 rounded measuring cup=1 oz.).

### WEEKLY USE

1. Check the pH of the pool water daily, adding sodium bisulfate (KEM TEK™ pH MINUS (-)) or soda ash (KEM TEK™ pH PLUS (+)) or equivalent products as necessary to maintain pH in the 7.2 - 7.6 range.
2. SHOCK POWER is made up of fine particles that dissolve almost instantly when applied to water. Use the entire bag for each application (if applicable). For best results, pour a steady stream of SHOCK POWER into the deep end of the pool or pour into the skimmer with the pump operating. Pour near the water surface (particularly if the wind is present while applying) to ensure the entire dose enters the water.
3. Operate the pump system 4-8 hours (minimum) after applying SHOCK POWER.
4. Use one pound of SHOCK POWER to treat 12,000 - 15,000 gallons of pool water every week for best results.

The use of SHOCK POWER also requires the one time use of cyanuric acid (KEM TEK STABILIZER - CONDITIONER) as described in the Start Up directions. This two-compound system results in a longer-lasting chlorine residual and reduced chlorine consumption. Both products are completely soluble.

### SUPER CHLORINATION:

When ever the pool water loses its sparkle, turns green or the chlorine residual falls rapidly after regular chlorination, super chlorination is recommended. During the summer months, water should be super chlorinated with 1 1/2 lb. per 10,000 gallons of pool water every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 3 ppm

### GENERAL POOL CARE

**HEAVY BATHER LOAD:** At the start of the swimming season, in filled pools, upon filling a pool, and after heavy swimmer load, super chlorination (shocking) is necessary. The addition of two or three times the normal amount of SHOCK POWER oxidizes and removes unwanted organic material. The pool should not be used during super-chlorination until the chlorine residual is less than 3 ppm. The end result is the establishment of a chlorine residual 1.0 - 1.5 ppm.

**VINYL LINED POOL CARE:** Vinyl lined are easily damaged by chemicals used to treat and maintain pools. SHOCK POWER is well suited for use in these pools, especially the above ground type which have only 3-4 foot depths and are not equipped with a bottom drain. SHOCK POWER dissolves rapidly and completely, so direct contact with liner is reduced and there are not residues to be sweep or vacuumed from the bottom. SHOCK POWER is not sensitive to the pH of the water and will not cloud the water even when shocking or super chlorinating as often occurs with calcium hypochlorite.

The following tables are a handy reference for average chlorine requirements, but must not be substituted for regular use of a test kit since pools and conditions vary considerably. Test water frequently and chlorinate as needed. Anticipate an increased chlorine consumption with increased swimming, hot water or weather, rain, a dirty or neglected pool, etc.

### TYPICAL DAILY DOSAGE (SUMMERTIME)

Pool Diameter	After Steps 1 & 2 above				
	Above-Ground Pools—3' to 4' DEEP				
12 Ft.	15 Ft.	18 Ft.	20 Ft.	24 Ft.	
Approx. Gallons	2,500	4,500	7,000	9,000	13,000
Dosage (ounces)	1	2	3	4	5
Pool Size (Feet)	In-Ground Pools—7' to 9' DEEP				
	14x28	16x32	17x34	18x36	20x40
Approx. Gallons	15,000	20,000	25,000	30,000	35,000
Dosage (ounces)	6	7	8	9	10

### GENERAL SPA CARE

1. SPA START UP: Before bathing, test pH, chlorine residual and alkalinity using a suitable test kit. Adjust chlorine residual to 3.0 ppm. After bathing, super chlorinate to 5.0 ppm (1 1/2 tablespoons per 500 gallons of water). Maintain pH water between 7.2 and 7.6 with soda ash (SPA KEM pH PLUS (+)) and sodium bisulfate, muriatic acid, or sulfuric acid (KEM TEK PH MINUS (-)) and total alkalinity between 125 and 175 ppm using sodium bicarbonate (SPA KEM ALKALINITY BOOSTER).
2. One tenth oz. (1/2 tsp.) per 250 gallons of water yields 1.0 ppm and 1 level tbsp. Yields 6.0 ppm of chlorine. To use, broadcast granules into water with the jets running. Bathing can start at once.
3. With 4 bathers in a 500 gallon spa a 2.0 ppm chlorine residual can drop below the minimum 1.0 ppm in 15 to 20 minutes. Less water or more bathers will accelerate loss. Test often and keep chlorine residual above 1.0 ppm.
4. Weekly, superchlorinate water to 5 or 6 ppm (see 2 above). Re-entry into spas is prohibited above levels of 3 ppm of chlorine. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage. Avoid use of products such as body lotion that can consume chlorine.

### STORAGE AND DISPOSAL

**STORAGE:** Keep product in tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. **DISPOSAL:** If empty: Do not reuse container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

### PRECAUTIONARY STATEMENTS

#### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**DANGER. CAUSES IRREVERSIBLE EYE DAMAGE. MAY BE FATAL IF INHALED. CAUSES SKIN IRRITATION. HARMFUL IF SWALLOWED OR ABSORBED THROUGH SKIN OR ON CLOTHING. DO NOT GET IN EYES, ON SKIN OR ON CLOTHING. DO NOT BREATHE DUST. WEAR GOGGLES OR FACE SHIELD, AND MASK OR PESTICIDE RESPIRATOR APPROVED BY THE NATIONAL INSTITUTE FOR OCCUPATIONAL SAFETY AND HEALTH. WASH THOROUGHLY WITH SOAP AND WATER AFTER HANDLING. REMOVE CONTAMINATED CLOTHING AND WASH BEFORE REUSE.**

### ENVIRONMENTAL HAZARDS

This product is toxic to fish.

If Swallowed	• Call a poison center • Promptly rinse mouth • DO NOT induce vomiting • Do not give anything by mouth unless instructed by a health care professional
If In Eyes	• Hold eyes open under running water for at least 15 minutes • Call a poison center
If On Skin or Clothing	• Take off contaminated clothing • Rinse skin thoroughly with water • Call a poison center
If Inhaled	• Move person to fresh air • If person is not breathing, call 911 or a poison center • Call a poison center
Has the product container been used?	
Notes to physician	

STRONG OXIDIZING AGENT. WITH TOXIC GASES. CONTACT WITH CHLORINE CONTAINING GASES, HARMFUL GASES. Mix only with dispensing device containing remnants of chlorine. Contact may lead to a fire or explosion. Contains a chemical reaction with generation of heat, fire and explosion. IN CASE OF FIRE, if possible, isolate and contain. Use large volume of water. IN CASE OF CONTACT WITH SKIN, Wash thoroughly with soap and water. EPA Reg. No. 7616-7
