Net Wt. 10 oz **SWIMMING POOL WATER DISINFECTANT** Made in USA

### The SHOCK POWER 67 Advantages:

This special blend of ingredients (patent pending) does it all. SHOCK POWER 67 works fast allowing swimmers back into the pool in just 15 minutes. This is a premium grade shock product, so it takes only one 10 ozs. of SHOCK POWER 67 to treat 12,000 gallons of pool water. SHOCK POWER 67 can be added directly into the water without pre-dissolving and it is ideal for all types of swimming pools. It destroys swimmer wastes and other impurities that cause cloudy water. SHOCK POWER 67 dissolves faster than ordinary shock products without leaving residue. It does not increase the pH of the pool water or contain calcium that causes scale build-up.  
**DO NOT PRE-DISSOLVE IN CONTAINER (i.e. bucket) BEFORE APPLYING.**

### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**DAILY USE:** After steps 1 and 2, regularly check chlorine residual with a test kit and chlorinate daily or as needed to maintain 1.0 to 1.5 ppm residual chlorine.

**NOTE:** 2 1/2 ounces of this compound per 10,000 gallons of pool water will increase an existing chlorine level by 1.0 ppm (1/8 rounded measuring cup= 1 oz.)

### WEEKLY USE

1. Check the pH of the pool water daily, adding sodium bisulfate (KEM TEK™ pH MINUS (-)) or soda ash (KEM TEK™ pH PLUS (+)) or equivalent products as necessary to maintain pH in the 7.2 - 7.6 range.
2. SHOCK POWER 67 is made up of fine particles that dissolve almost instantly when applied to water. Use the entire bag for each application (if applicable). For best results, pour a steady stream of SHOCK POWER 67 into the deep end of the pool or pour into the skimmer with the pump operating. Pour near the water surface (particularly if the wind is present while applying) to ensure the entire dose enters the water.
3. Operate the pump system 4-8 hours (minimum) after applying SHOCK POWER 67.
4. Use 10 ozs. of SHOCK POWER 67 to treat 12,000 - 15,000 gallons of pool water every week for best results.

### SUPER CHLORINATION:

When ever the pool water loses its sparkle, turns green, or the chlorine residual falls rapidly after regular chlorination, super chlorination is recommended. During the summer months, water should be super chlorinated with 1 lb. Per 10,000 gallons of pool water every 10 to 14 days. Do not use the pool until the chlorine level has dropped to 3 ppm.

### STORAGE AND DISPOSAL

**STORAGE:** Keep product in tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. **DISPOSAL:** If you do not reuse container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
