PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

CAUTION

Keep out of reach of children. Harmful if swallowed. Avoid contact with skin and eyes. Avoid breathing dust. Wash thoroughly with soap and water after handling and before eating or smoking. If in eyes, wash with plenty of water for 15 minutes. If irritation persists, see a physician.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE - GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

No pre-slaughter withholding period is required.

Pigs (weaners to market weight): Mix 25 lb. of Walnut Grove 4x4 Add-Mix Fly-Kil per ton of meal type feed and offer free choice. This is equivalent to 22.7 mg of Ralon per lb. of feed.

Cows, Hens, and Breeding Gilts: Mix 50 lb. of Walnut Grove 4x4 Add-Mix Fly-Kil per ton of meal type feed and offer 4 to 6 lb. of feed per animal per day. This is equivalent to 45.4 mg of Ralon per lb. of feed.

Start feeding Walnut Grove 4x4 Add-Mix Fly-Kil early in the spring before flies begin to appear and continue feeding throughout the summer and into the fall until cold weather restricts fly activity.

All swine should be treated. Walnut Grove 4x4 Add-Mix Fly-Kil prevents development of house flies in the manure from treated swine but is not effective against existing adult flies.

In some cases, supplemental fly control measures may be needed in and around the area to control adult flies which move in from other areas or which breed in decaying vegetable matter elsewhere on the premises. To maximize effective summer fly control, Walnut Grove 4x4 Add-Mix Fly-Kil should be used in conjunction with other good management and sanitation practices.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store Walnut Grove 4x4 Add-Mix Fly-Kil in a dry, well ventilated storage area away from other pesticides, animal feeds, fertilizers, and chemicals. Store in original container with label intact to prevent loss of identity of product. Repair damaged bags promptly to prevent possible contamination of other products.

PESTICIDE DISPOSAL: Pesticide, spray mixture, or rinse water that cannot be used according to label instructions must be disposed of according to applicable Federal, State or local procedures.

EMPTY CONTAINER DISPOSAL: Completely empty bag by shaking and tapping, and use for other purposes. If not possible, use for other purposes. Then dispose of bags in a sanitary landfill or by incineration if allowed by State and local authorities.
