WARDLEY'S "ALLCLEAR" ALGICIDE FOR OUTDOOR FISHPOOLS

ALLCLEAR[®] ALGICIDE

FOR OUTDOOR FISHPOOLS

WARDLEY'S ALLCLEAR ALGICIDE will control most algae common to outdoor, ornamental fish pools and prevent algae from reappearing when used as directed. Always use ALLCLEAR ALGICIDE when setting up a new ornamental fishpool or pond.

PLEASE READ CAREFULLY DIRECTIONS FOR USE

Break open pouch and squeeze tablet directly into the water.

TO CONTROL ALGAE—Add one tablet to each 50 gallons of water when algae are first visible or after cleaning of an algae infested pool. Add one half of one tablet for each 25 gallons of water.

* See explanation below and illustrated insert to determine gallon capacity of your pool or pond. Distribute tablets uniformly throughout the pool or pond area. The bubbling action of the tablets will help to distribute the ingredients throughout the water.

OXYGEN DEPLETION—To prevent oxygen depletion remove any heavy algae growths mechanically before treatment and aerate water continually after treatment.

TO PREVENT ALGAE FROM REOCCURRING—Use 1 tablet per 100 gallons of water once a month until algae become visible, then use 1 tablet per 50 gallons of water once a week until algae are no longer visible.

USE WARDLEY'S ALLCLEAR ALGICIDE ONLY IN POOLS OR PONDS WITH STATIONARY WATER CONDITIONS. THIS INCLUDES POOLS OR PONDS THAT UTILIZE A RECIRCULATION SYSTEM OR FILTERING SYSTEM. DO NOT USE IN BODIES OF NATURAL RUNNING WATER.

*Use the following formulas to calculate the total gallon (U.S. Gal.) capacity of your pool or pond.

Note—MAKE CERTAIN ALL MEASUREMENTS AND CALCULATIONS ARE ACCOMPLISHED IN TERMS OF THE SAME UNIT OF MEASURE—FEET.

RECTANGULAR OR SQUARE SHAPED POOLS: Multiply the length times the width times the average depth then multiply this total times 7.5. This will give you the approximate number of gallons in your pool or pond.

NOTE: Please refer to illustrated leaflet for examples of measuring and calculating various shaped pools and ponds.

CIRCULAR POOLS: Multiply the diameter times itself, then multiply this total times the average depth and this total times 5.9. This will give you the approximate number of gallons in your pool or pond.

IRREGULAR SHAPED POOLS, KIDNEY SHAPED, ELLIPTICAL SHAPED, ETC.: Multiply the long diameter by the short diameter then multiply this total times the average depth and this total times 5.9. This will give you the approximate number of gallons in your pool or pond.

ACTIVE INGREDIENTS: Monuron 3-(p-chlorophenyl)-1, 1-dimethylurea; Dehydroacetylamine sulfate; Dichloro (2,3-Dichloro-1, 4-naphthoquinone).

INERT INGREDIENTS: Sodium Bicarbonate, Tartaric Acid, Lactose, Stearic Acid, Starch.

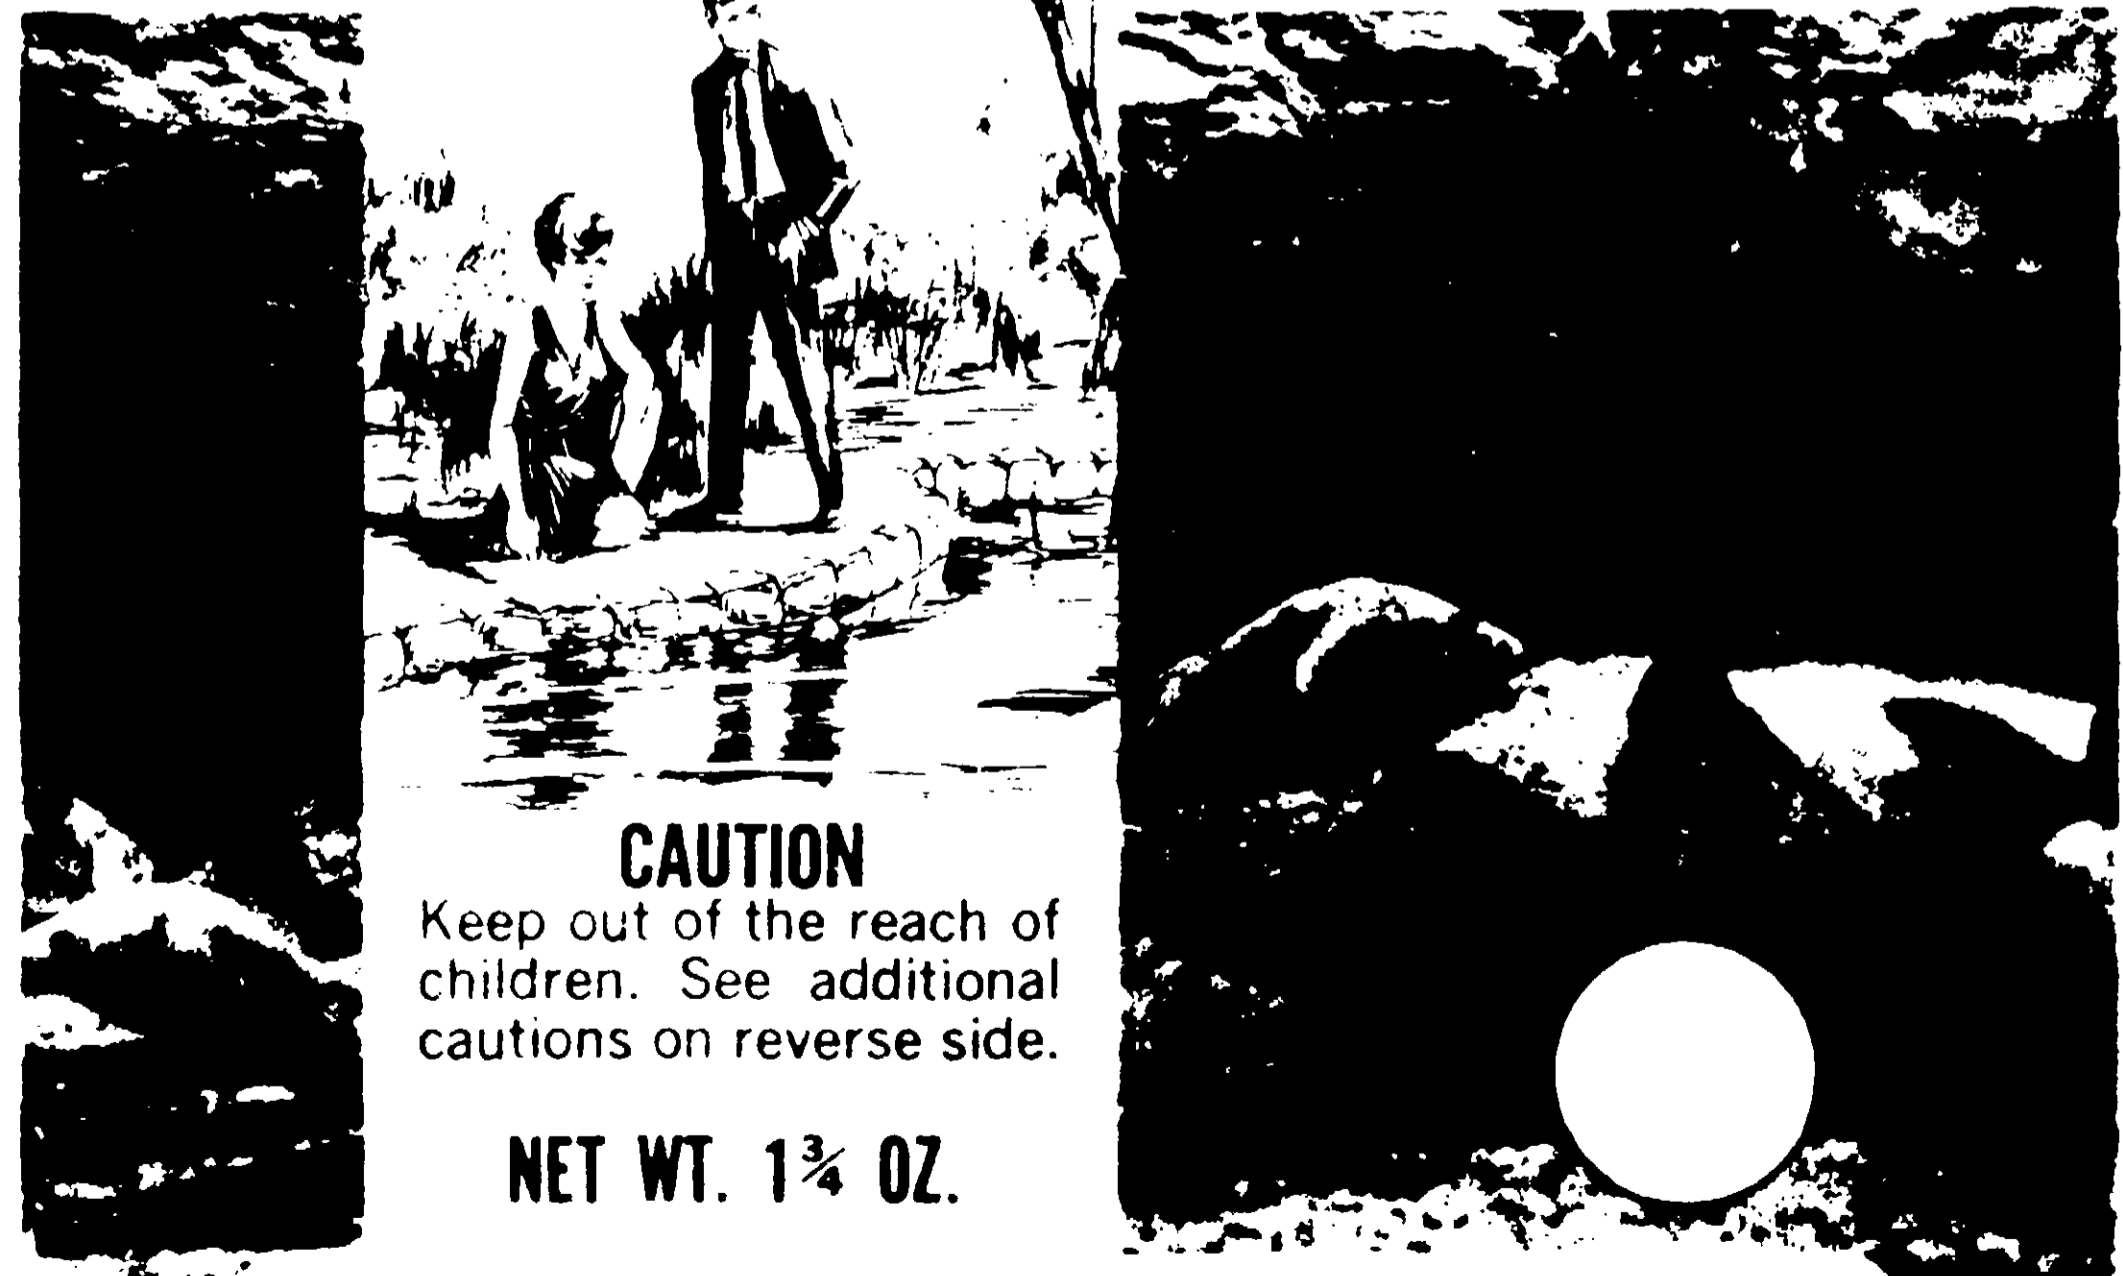

TOTAL INERT INGREDIENTS: 95.239%
CAUTION: Harmful if swallowed. Avoid contact with skin or eyes. Wash hands after use. Avoid storage near feed and food products. Store in cool, dry area. These tablets are designed for ornamental fishpool use only. Follow good housekeeping practice by keeping out of reach of children and household pets.

WARDLEY PRODUCTS COMPANY, Inc.
Long Island City, N. Y. 11101, U.S.A.

ITEM #295-298
U.S.O.A. REG. NO. 7689-4

MADE IN U.S.A.

CONTROLS
MANY ALGAE
TREATS
600 GALLONS

CAUTION

Keep out of the reach of children. See additional cautions on reverse side.

NET WT. 1 3/4 OZ.

WARDLEY'S ALLCLEAR ALGICIDE

ALLCLEAR

FOR OUTDOOR FISHPOOLS

WARDLEY'S ALLCLEAR ALGICIDE is the most effective algae control for outdoor fishpools and prevents algae from reappearing when the ALGICIDE has settled up a new treatment period.

PLEASE READ CAREFULLY

Break open each and squeeze tablet directly into the pool.

TO CONTROL ALGAE: Add one tablet to each 100 gallons of water. Add one tablet to each 100 gallons of water after the first 24 hours of treatment.

See the instructions on the back of the tablet for more information.

OXYGEN DEPLETION: To prevent oxygen depletion, aerate the water by using an aerator or pump.

TO PREVENT ALGAE FROM REAPPEARING: Use one tablet per 100 gallons of water every 30 days.

USE WARDLEY'S ALLCLEAR ALGICIDE ONLY IN FRESH WATER. DO NOT USE IN SALT WATER.

CAUTION: Do not use in ponds or streams.

Use the following formulas to calculate the total amount of tablets to use:

RECTANGULAR OR SQUARE SHAPED POOLS: Measure the length and width of the pool in feet. Multiply the length by the width to get the area in square feet. Multiply the area by the average depth in feet to get the volume in cubic feet. Multiply the volume by 7.48 to get the volume in gallons. Multiply the volume in gallons by the dosage rate to get the total amount of tablets to use.

CIRCULAR POOLS: Measure the diameter of the pool in feet. Multiply the diameter by the diameter to get the area in square feet. Multiply the area by the average depth in feet to get the volume in cubic feet. Multiply the volume by 7.48 to get the volume in gallons. Multiply the volume in gallons by the dosage rate to get the total amount of tablets to use.

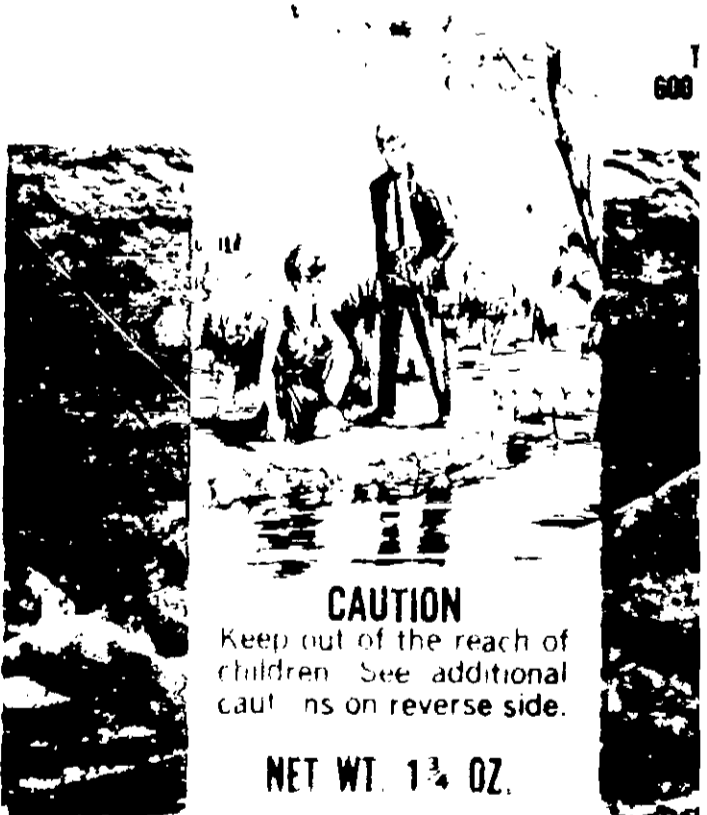

IRREGULAR SHAPED POOLS: Measure the length and width of the pool in feet. Multiply the length by the width to get the area in square feet. Multiply the area by the average depth in feet to get the volume in cubic feet. Multiply the volume by 7.48 to get the volume in gallons. Multiply the volume in gallons by the dosage rate to get the total amount of tablets to use.

ACTIVE INGREDIENTS: Monuron 2.3% (0.023%)

INERT INGREDIENTS: Sodium Bicarbonate 97.7% (0.977%)

TOTAL INERT INGREDIENTS: 97.7%

CAUTION: Harmful to fish and other aquatic life. Avoid contact with eyes, nose, mouth, and skin. Do not breathe dust. Do not get on clothing. Do not use in ponds or streams.

CAUTION
Keep out of the reach of children. See additional cautions on reverse side.

NET WT. 1 1/4 OZ.
