

SPACE SPRAY INSECTICIDE

Directions For Use:

This space spray insecticide is especially formulated to control flies, mosquitos, gnats, wasps and certain other flying insects.

Direct a fine spray toward upper sections of the room and saturate the atmosphere. Apply at the rate of 1 to 2 ounces per 2000 cubic feet.

May be used as a temporary control for ants, roaches, silverfish and spiders.

Spray all areas behind baseboards, moldings, furniture, cabinets, shelves, sinks, pipes, drains, cracks and dark corners until thoroughly soaked. Treat doorills and window frames where the pests may enter. For best results try to contact these insects with the spray.

For Use in Motels, Hotels, Institutions,
Restaurants, Homes, Food Storage,
Packaging and Processing Areas

This space insecticide is designed for dispensing through all types of spraying equipment, both manually operated or electrical, to disperse a fine hanging mist. To avoid staining, hold the sprayer at least three feet from all objects. Close door and saturate the atmosphere. Keep door closed and vacant for ten minutes after spraying. Sweep up and destroy all fallen insects.

CAUTION: Harmful if swallowed. In case of skin contact wash with soap and water. Do not breathe vapors or mists. Do not spray on animals. Remove all cold blooded animals and fish from room. Do not use around birds. Foods, food processing areas or utensils should be covered or removed before treatment. In case of contamination these items should be thoroughly washed before using again. When this product is used as a space spray use only when premises are not occupied. Do not store near heat or open flame.

Not Reviewed. Registrant claims to be in accordance with Reregistration of Pesticide Product Guidance for Phase 2 Response, Page 2.12, Active to Inert Change in Status.
