PET PLEASE

When used according to directions this spray will kill ticks, lice, fleas and gnats on contact. Also acts as a repellent on flies, gnats and mosquitoes. Besides having a pleased pet your pet will be pleased as this also controls doggy odors due to skin bacteria.

DIRECTION:

Apply spray to pet from a distance of 10 to 12 inches. Start spraying at the tail, moving the spray rapidly and making sure the entire animal's body is covered including the legs and under portion of the body. As you spray fluff the coat so the spray will penetrate to the skin. Spray only until the coat is slightly damp. Do not spray eyes, face or scrotum. For best results spray ticks directly. Spray animals bed and living quarters regularly. Repeat treatment weekly, but at no shorter intervals. Spray on the basis of a 20 to 30 second application to a 25 pound dog and 10 seconds to a cat.

CAUTION: Do not spray around food or foodstuff. Avoid inhalation of the vapors. It is preferable to spray in a well ventilated area. Store container in a cool place. Do not use on birds or around fish bowls. Do not spray in eyes, face or scrotum. Do not spray into one area, but move continuously while spraying. If by accident you spray your hands or person wash the area with soap and water. Contents under pressure. Do not puncture or dispose of container in fire. FLAMMABLE: Do not spray in or around flame.

ACTIVE INGREDIENTS:

Pyrethrins	-----	0.00
*Technical Piperonyl Butoxide	-----	0.48
Carbaryl	-----	0.50
** (1-methyl-4-methylcarbamate, 2,2-bis(4-chloro-6-methyl-phenyl)-	-----	0.10
2,3,4,5, bis(Δ, 2-butylene)- tetrahydrofurfural	-----	0.34
Petroleum Distillate	-----	12.50
INERT INGREDIENTS:		
Propellant and perfume	-----	0.12
Total ingredients		100.00

* Equivalent to 0.384% (butyl carbityl) (o-propyl piperonyl) ether and 0.096% of related compounds.
