

[7701-53]

For Use In Motels, Hotels, Restaurants,
Restaurants, Homes, Food Storage, Packaging
And Processing Areas.

The store must be designed to prevent dispensing into any air space of spraying equipment, both manually operated or electrical, to dispense a fine hanging mist. To avoid this, hold the sprayer at least three feet from objects.

DIRECTIONS FOR USE: This space spray is formulated to control flies, mosquitoes, gnats and wasps.

2. Hold the fine spray toward upper sections of the room. After filling the room with the mist, leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

WASPS: Application should be made in the late evening when wasps are at rest. Spray liberally into the hiding and breeding places, contacting as many of the wasps as possible. Repeat as necessary.

U.F.A. Rep. No. 70-15

WANT TO ACQUIRE BY

Chemical Specialties, Inc.

SYNCO SPRAY INSECTICIDE

A new synthetic pyrethroid for controlling the following flying insects: flies, mosquitos, gnats and wasps.

4. *Conclusions*

[illegible]
