

[7710-2]

INDUSTRIAL TYPE

TIME-MIST INSECTICIDE is engineered for highly effective use in the TIME-MIST Automatic Aerosol Dispenser, is stronger than ordinary synergized pyrethrin sprays, and of special design. The TIME-MIST Dispenser automatically actuates the special metered valve every fifteen minutes, releasing tiny particles which remain suspended in the air. Within 24 hours the area is relatively free of flies, mosquitos, gnats, even D.D.T. resistant flies and with continued use reduces annoyance from them. One TIME-MIST Dispenser is designed to protect a room up to 30' x 20' x 10'.

OPERATION: Remove protective cap from top of can and insert TIME-MIST Dispenser. Suspend Dispenser 7' from the floor and at a point where wind flow will carry the particles throughout the room.

ACTIVE INGREDIENTS:

Pyrethrin 10.1
 Pyrethrum Distillates 10.1
 Inert Ingredients 79.8
 Total 100.0

WARNING: Do not use in nurseries or rooms where infants, ill or aged people are confined. Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.
