

[7710-8]

INDUSTRIAL TYPE

TIME-MIST INSECTICIDE is especially designed for most effective use in the TIME-MIST Automatic Aerosol Dispenser. A very strong, longer-lasting insecticide, and of special design for long-lasting operation. The TIME-MIST Dispenser automatically actuates the special metered valve every fifteen minutes, releasing tiny particles which remain suspended in air, killing flies, mosquitoes, gnats, and flying moths. Within 24 hours the area is relatively free of the pests and free from annoyance from them. One TIME-MIST Dispenser is designed to protect a room up to 30 x 20 x 10 for 30 days, 24 hours per day.

OPERATION: Remove the top cap from top of can and insert TIME-MIST Dispenser. Suspend Dispenser 7" from the floor and at a point where wind flow will carry the particles throughout the room.

ACTIVE INGREDIENTS

Pyrethrin 0.05%
