INGREDIENTS

Ground Barley, Wheat Mill Run, Cane Molasses, Soy Bean Mill Run, Saf-Phos, Dicalcium Phosphate, Sodium Tri-Polyphosphate, Zinc Oxide, Ferrous Carbonate, Vitamin A, Vitamin D

FEEDING INSTRUCTIONS

Feed LESLIE FLY CONTROL BLOC continuously as the sole source of salt. Observe consumption rate carefully to assure cattle are consuming the blocks at the rate directed. Feed one half (1/2) ounce per 100 lbs. of body weight daily and four (4) ounces of product for animals weighing 800 lbs. or more.

Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism.

WARNING

Do not feed to lactating dairy animals. Keep out of reach of children. Occasional sensitivity to Phenothiazine has been reported in cattle. This product prevents the breeding of horn flies in the manure, but does not affect any existing adult flies. Since face flies migrate from farm to farm it is essential that the larvicide program be carried out on an area basis to assist in the reduction of the adult fly population. Supply ample number of blocks—two for every 25 head of cattle.

NET WEIGHT 33 1/3 LBS.
