DACONIL 2787\* a new patented non-mercurial broad spectrum fungicide.

**WARRANTY AND LIMITATION  
OF DAMAGES**

SELLER warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and BUYER assumes the risk of any use contrary to such directions. SELLER makes no other expressed or implied warranty, including any other expressed or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of SELLER is authorized to do so except in writing with a specific reference to this warranty. In no event shall SELLER'S liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

**Controls Common  
Turf Diseases**  
Dollar Spot  
Brown Patch  
Leaf Spot  
Melting Out  
and certain other diseases

**Controls Common  
Ornamental Diseases**  
**Roses:** Black Spot  
Blossom Blight  
**Iris:** Leaf Spot  
**Geraniums:** Botrytis Blight  
(Leaf Spot)  
**Chrysanthemums:** Ray  
Blight, Gray Mold and  
certain other diseases.

**CAUTION:**

Harmful if swallowed or inhaled. Induce vomiting if swallowed. Avoid breathing dust or spray mist. May cause irritation to eyes, nose, throat and skin. Avoid contact with eyes, skin, or clothing. In case of contact, flush with plenty of water. For eyes, get medical attention. Wash hands and skin thoroughly after using. Avoid contamination of feed and foodstuff. Toxic to fish and wildlife. Do not contaminate ornamental fish ponds. Do not reuse container—destroy when empty.

LAWN AND ORNAMENTAL FUNGICIDE  
READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS; AND IN ACCORDANCE WITH FEDERAL AND STATE REGULATIONS.

**STORE IN A DRY PLACE**

**GENERAL INFORMATION:** DACONIL 2787 fungicide is a wettable powder formulation to be used as a spray, and is highly effective for the control of a number of important turf and lawn diseases as well as a number of commonly occurring diseases of ornamentals. DACONIL 2787 is specifically formulated for use on golf greens, golf fairways, lawns, parks, grass tennis courts and other fine turf areas, as well as on a number of ornamentals. DACONIL 2787 is formulated for best results; therefore, additional spreaders, stickers or wetting agents should not be added. Agitation should be maintained during spraying to prevent settling out of the material and to insure maximum effectiveness.

**DIRECTIONS FOR USE ON TURF:** DACONIL 2787 fungicide is recommended for the control of turf and lawn diseases such as, (SCLEROTINIA) DOLLAR SPOT, (RHIZOCTONIA) BROWN PATCH, (PIRICULARIA) GRAY LEAF SPOT, (CURVULARIA and HELMINTHOSPORIUM) LEAF SPOT (BLIGHT, GOING-OUT, FADING-OUT, and MELTING-OUT) and certain other diseases.

To obtain maximum results, it is important that DACONIL 2787 fungicide be used in conjunction with a good turf management program. Use the following management schedule as a guide.

**MANAGEMENT SCHEDULE:** (1) One day before treatment—mow lawn, irrigate if necessary. (2) Day of treatment—after morning dew is off lawn, apply DACONIL 2787 fungicide as directed (see below). Do not mow or water grass after treatment until grass is thoroughly dry. (3) It is suggested to wait 24 hours before any watering is done.

**WHEN TO USE:** Start spray applications in the Spring before diseases appear, and repeat at 7 to 14-day intervals. During periods of wet weather or severe disease conditions, make applications on a 7-day schedule.

**HOW TO USE:** (Preventative and Curative) DACONIL 2787 fungicide should be applied uniformly and with sufficient water to provide complete coverage.

**MIXING DIRECTIONS**

AREA TO TREAT	AMOUNT OF PRODUCT	AMOUNT OF WATER
200 Sq. Ft.	6 level tablespoons	3 gallons
500 Sq. Ft.	15 level tablespoons (2 oz.)	7 1/2 gallons
1000 Sq. Ft.	30 level tablespoons (4 oz.)	15 gallons

**FOR HOSE-END SPRAYER:** (1) Determine amount of product from table above. (2) Add the required amount of product to the sprayer jar and add a small amount of water. (3) Mix until thin paste is formed, add desired amount of water and stir. Apply spray evenly. Agitate jar while spraying. Do not store diluted spray. Make new dilution for each use.

**DIRECTIONS FOR USE ON ORNAMENTALS:** DACONIL 2787 fungicide is recommended as follows for the control of a number of diseases on ornamentals. On **ROSES** for the control of **BLACK SPOT** and **BLOSSOM BLIGHT**, and for the suppression of **POWDERY MILDEW** apply DACONIL 2787 at the rate of 1 tablespoon per gallon of water. On **CHRYSANTHEMUMS** for the control of **ASCOCHYTA RAY BLIGHT** and **GRAY MOLD**; on **GERANIUMS** for the control of **BOTRYTIS BLIGHT (LEAF SPOT)** and on **IRIS** for the control of **BOTRYTIS BLIGHT (BLOSSOM BLIGHT)** and **IRIS LEAF SPOT**, apply DACONIL 2787 at the rate of 1 1/2 tablespoons per gallon of water. Apply DACONIL 2787 at first sign of disease and repeat at 7 to 14-day intervals throughout the season. Make applications on a 7-day schedule during periods of wet weather or severe conditions.

**SPECIAL COMBINATION SPRAYS**

**Turf Control**—lawn insects such as white grubs, wireworms, sod webworms and ants—as well as listed diseases—use 4 teaspoons of HERITAGE HOUSE 72% CHLORDANE SPRAY with 6 level tablespoons of DACONIL 2787 fungicide for 200 sq. ft.

**Ornamentals**—such as **Roses, Chrysanthemums, and Geraniums**: To control certain insects, such as aphids, mites, thrips, white flies and Japanese beetles—as well as listed diseases—use 2 tablespoons of HERITAGE HOUSE SYSTEMIC INSECT SPRAY with 1 to 1 1/2 tablespoons of DACONIL 2787 fungicide to one gallon of water. Spray until run off.

### STORE IN A DRY PLACE

**GENERAL INFORMATION:** DACONIL 2787 is a wettable powder formulation to be used as a spray and is highly effective for the control of a number of important turf and lawn diseases, as well as a number of commonly occurring diseases of ornamentals. DACONIL 2787 is specifically formulated for use on golf greens, golf fairways, lawns, parks, grass tennis courts and other fine turf areas, as well as on a number of ornamentals. DACONIL 2787 is formulated for best results; therefore additional spreaders, stickers or wetting agents should not be added. Agitation should be maintained during spraying to prevent settling out of the material and to insure maximum effectiveness.

**DIRECTIONS FOR USE ON TURF:** DACONIL 2787 fungicide is recommended for the control of turf and lawn diseases such as: (SCLEROTINIA) DOLLAR SPOT, (RHIZOCTONIA) BROWN PATCH, (FUSARIUM) GRAY LEAF SPOT, (CURVULARIA and HELMINTHOSPORIUM) LEAF SPOT (BRIGHT GREENING OUT, FADING-OUT and MELTING-OUT) and certain other diseases.

To obtain maximum results, it is important that DACONIL 2787 fungicide be used in conjunction with a good turf management program. Use the following management schedule as a guide:

**MANAGEMENT SCHEDULE:** (1) One day before treatment, mow lawn; irrigate if necessary. (2) Day of treatment—after morning dew is off, lawn, apply DACONIL 2787 fungicide as directed (see below). Do not mow or water grass after treatment until grass is thoroughly dry. (3) It is suggested to wait 24 hours before any watering is done.

**WHEN TO USE:** Start spray applications in the Spring before a disease appears, and repeat at 7 to 14 day intervals during periods of wet weather or severe disease conditions. Make applications on a 7-day schedule.

**HOW TO USE:** (Preventative and Curative) DACONIL 2787 fungicide should be applied in form of a spray and with sufficient water to provide adequate coverage.

### MIXING DIRECTIONS

AREA TO TREAT	AMOUNT OF PRODUCT	AMOUNT OF WATER
200 Sq. Ft.	5 level tablespoons	1 gallon
500 Sq. Ft.	15 level tablespoons (2 oz.)	1 gallon
1000 Sq. Ft.	30 level tablespoons (4 oz.)	1 gallon

**FOR HOSE END SPRAYER:** (1) Determine amount of product from table above. (2) Add the required amount of product to the sprayer and add a small amount of water to wet the nozzle. (3) Fill the sprayer with the amount of water indicated in the table. Apply spray evenly. After use, wash sprayer. Do not store diluted spray. Make new dilutions for each use.

**DIRECTIONS FOR USE ON ORNAMENTALS:** DACONIL 2787 is recommended as follows for the control of a number of diseases of ornamentals: On **ROSES** for the control of BLACK SPOT and BLOSSOM BLIGHT and for the suppression of POWDERY MILDEW, apply DACONIL 2787 at the rate of 1 tablespoon per gallon of water. On **CHRYSANTHEMUMS** for the control of ASCOCHYTA RAY BLIGHT and GRAY MOLD, on **GERANIUMS** for the control of BOTRYTIS BLIGHT (LEAF SPOT) and on **IRIS** for the control of BOTRYTIS BLIGHT (BLOSSOM BLIGHT) and IRIS LEAF SPOT, apply DACONIL 2787 at the rate of 1 1/2 tablespoons per gallon of water. Apply DACONIL 2787 at first sign of disease and repeat at 7 to 14 day intervals throughout the season. Make applications on a 7-day schedule during periods of wet weather or severe conditions.

### SPECIAL COMBINATION SPRAYS

**Turf Control:** Lawn insects such as white grubs, wireworms, cutworms and ants, as well as lawn diseases, may be controlled by mixing DACONIL 2787 FUNGICIDE SPRAY with a wettable powder insecticide fungicide for 1000 sq. ft.

**Ornamentals—**such as Roses, Chrysanthemums, and Geraniums, may be controlled by such insects as the European spruce sawfly, the European spruce sawfly, as well as leafhoppers, and other insects. Apply the SYSTEMIC INSECTICIDE with the fungicide. For more information on the use of DACONIL 2787 FUNGICIDE, contact your local water control authority.

### CAUTION

Harmful if swallowed or inhaled. Avoid contact with skin. If swallowed, avoid breathing dust or spray mist. May cause irritation to eyes, nose, throat and skin. Avoid contact with eyes, skin, or clothing. In case of contact, flush with plenty of water. For eyes, get medical attention. Wash hands and skin thoroughly after using. Avoid contamination of feed and foodstuffs. Toxic to fish and wildlife. Do not contaminate ornamental fish ponds. Do not reuse container—destroy when empty.
