CHINCH BUG CONTROL

Controls Chinch Bugs Highly Resistant
To Certain Other Insecticides
Covers 1,500 square feet

ACTIVE INGREDIENTS

INERT INGREDIENTS

WARNING: Keep out of reach of
children. Read back panel for addi-
tional cautions.

**READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS,
AND WITH APPLICABLE FEDERAL AND STATE REGULATIONS.**

DIRECTIONS FOR USE:

LAWN AND TURF: CHINCH BUGS: Wet lawn thoroughly, then apply one pint of HERITAGE HOUSE CHINCH BUG CONTROL in 30 to 50 gallons of water to 1,500 sq. ft. of lawn area, with sufficient pressure to drive spray into turfgrass. Wash spray into soil and allow to dry before permitting children or pets on treated area.

HOSE END USE: Wet lawn thoroughly, use 1/3 pint of HERITAGE HOUSE CHINCH BUG CONTROL in a hose end sprayer jar. Add water to 15 gallon mark, mix thoroughly. Apply entire contents uniformly to 500 square feet of lawn area, directing spray to penetrate turfgrass. Wash spray into soil and allow to dry before permitting children or pets on treated area.

Apply when chinch bugs first noted. Repeat application if insects reappear. In areas where this insect is a severe problem, repeat applications are suggested at 6 to 8 week intervals.

KEEP CHILDREN AND PETS OFF TREATED AREAS UNTIL THE SPRAY HAS DRIED.

WARNING: Harmful if swallowed. Avoid breathing spray mist. Contact with skin can cause toxic symptoms. In case of contact with skin wash with soap and water. For eyes, flush with water for 15 minutes, get medical attention.

ABOUT CHINCH BUGS

Chinch bugs are one of the most troublesome and damaging pests of ornamental turf. They are a professional pest. Chinch bugs attack the turf at or near ground level, sucking sap and causing the grass to wilt, turn brown and die. Large sections of affected turf to turn brown and dry as if attached by disease or drought.

The adult chinch bug is not difficult to find. In areas where damage seems to be taking place, take a metal probe and insert one end several inches into the ground. Fill the can with water. In about five minutes any chinch bugs will come to the water. (Don't look for chinch bugs in areas where the turf is completely dead, as they are on living grass and die when crushed. They are about this size:

WARNING: Harmful if swallowed. Avoid breathing spray mist. Contact with skin can cause toxic symptoms. In case of contact with skin wash with soap and water. For eyes, flush with water for 15 minutes, get med-

ical attention. Wash hands after use. Avoid contamination of feed and foodstuffs. Do not get in eyes, on skin or on clothing. Do not use on household pets or humans. **DO NOT USE, POUR SPILL OR STORE NEAR HEAT OR OPEN FLAME.** Do not apply to lawns that are not well irrigated or when air temperature exceeds 90°F. Do not contaminate drinking water. When container is empty, immediately wash thoroughly and destroy. Never re-use. Toxic to fish and wildlife. Do not contaminate ornamental fish ponds.

WARRANTY AND LIMITATION OF DAMAGES

SELLER warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and BUYER assumes the risk of any use contrary to such directions. SELLER makes no other express or implied warranty, including any other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of SELLER is authorized to do so except in writing with a specific reference to this warranty. In no event shall SELLER'S liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

ABOUT CHINCH BUGS

Chinch bugs are one of the most troublesome and damaging pests of ornamental turf. They are a problem throughout the warm season of the year. Chinch bugs attack the turf at or near ground level, sucking sap and causing the grass to wilt, turn brown and die. They spread rapidly and cause the large sections of affected turf to turn brown and dry as if attacked by disease or drought.

The adult chinch bug is not difficult to find. In areas where damage seems to be taking place, take a metal coffee can with both ends removed, and insert one end several inches into the ground. Fill the can with water. In about five minutes any chinch bugs present will float to the surface of the water. (Don't look for chinch bugs in areas where the turf is completely dead, as they are on living grass.) These small insects have a strong, vile odor when crushed. They are about this size:
