

## How to use

Only the natural landing places need be treated such as edges of window sills, roof ridges, gutter edges, tops of signs, ornamental copings, cornices and ledges.

Insert cartridge to fit any standard caulking gun and use a one-half inch nozzle.

 Roost-No-More is conveniently packaged eight cartridges to a case for economical use. Just insert cartridge into any standard 10 inch cartridge Caulking gun.

**RAIN WILL NOT WASH AWAY ROOST-NO-MORE WHEN APPLIED AS DIRECTED.**

Remove all nests. Use wire brush to clean surface. On porous material such as stone, use water-proof silicone base material to form sealer against penetration of surface. Surface must be clean and dry. Do not apply in rainy, damp weather or below-freezing temperatures.

For trees and shrubs use Roost-No-More Liquid

Keep out of Reach of Children

# NO MORE

REPELLS  
NUISANCE  
BIRDS

Strip on ribbons of ROOST-NO-MORE 1/2 inch wide and 1/2 inch thick, 1/2 inch from the edge of ledges, sills, etc. Birds sometimes overshoot their mark in landing and skid farther in. Additional "lines of defense" should be laid where space requires. For pigeons, these strips should be 3 inches apart and for starlings 2 inches apart.

On cornices and similar projections, apply a strip every 3 inches. A single strip will do along the top of a thin sign, sharp roof ridge, narrow structural iron, etc. Treat wall tops as ledges. Rain gutters need a strip along the outer lip and a broken line around downspout.

ROOST-NO-MORE is harmless to birds. When they have accidentally brushed ROOST-NO-MORE on wings and are unable to fly, use a damp cloth with mineral spirits and clean affected area.

**ACTIVE INGREDIENTS**

Polymerized Butenes and Related Alkenes . . . . . 96%

**INERT INGREDIENTS**

Industrial Soaps . . . . . 4%

**PREVENTS PIGEONS AND STARLINGS FROM LANDING OR NESTING WHERE APPLIED.**
