JAYGOL FLYING INSECT KILLER
SHAKE WELL BEFORE USING

To spray: Remove protective cap. Hold container upright. Turn valve opening away from face and press button.

To kill flying insects, flies, mosquitoes, flying moths, gnats, wasps— There is no need to spray directly at flying insects — the mist in the air will kill them. Close all doors and windows. **Spray up into the air** with a sweeping motion, keeping about 3 feet from interior walls, fabrics, furniture. Until room is filled with mist. **Keep room closed for 15 minutes. Don't waste Flying Insect Spray — a little goes a long way.**

To kill crawling insects, roaches, waterbugs, silverfish, crickets— Spray hiding places such as baseboards and floor boards, moist places, openings around sinks, drains and pipes, behind bookcases, cabinets and other storage areas **hitting as many insects as possible. Repeat as needed.**

Ants — Spray trails, hills, around pipes and baseboards where ants crawl, **hitting as many as possible.**

Spiders, earwigs, bees, bees — Spray webs and places where these pests crawl. **Be as thorough as possible.**

Carpet beetles — Hit these bugs directly with spray on sections of floor, baseboards, shelves and underneath of carpets. Repeat spraying at frequent intervals.

Bedbugs — Spray mattresses, moldings, floor boards. Spray mattresses, particularly around springs and coils. Take beds apart and spray into all joints. Repeat spraying at frequent intervals.

Blacks — Spray floors, floor coverings and sleeping quarters of pets. Repeat spraying as often as necessary.

CAUTION — Never puncture or throw container into fire. Never set container on stove, radiator or other heat source. Temperature will exceed 120°F which may cause it to burst.

ACTIVE INGREDIENTS — Piperonyl butoxide 20%; technical piperonyl butoxide 1.00% (equivalent to 20% piperonyl butoxide); (16-propylpiperonyl) ether and 0.20% related compounds; (2-ethyl bicycloheptene) dicarboximide 1.00%; petroleum jelly 8.80%.

INERT INGREDIENTS — 89%
