

**DIRECTIONS**

CROUCH'S Sodium Hypochlorite contains 10% available chlorine by volume. Use diluted solutions only.

Using 5 fluid ounces of CROUCH'S Sodium Hypochlorite in 3 gallons of water will give 1,000 ppm.

Using 1 fluid ounce of CROUCH'S Sodium Hypochlorite in 3 gallons of water will give 200 ppm.

**GENERAL DIRECTIONS:**

For hard non-porous surfaces use 200 ppm solution.

For porous surfaces and surfaces difficult to clean use 1000 ppm solution.

Wash clean, then use clean, cool water for rinse solutions, in strength recommended by health regulations.

Solution should be used reasonably soon after mixing to get full strength of contents.

Degrades with age. Use a test kit and increase dosage as necessary to obtain required level of available chlorine.

Rinse food contact surfaces with potable water before re-use after using solutions containing over 200 PPM available chlorine.

Due to corrosion, do not soak over night. Keep in cool, dark place as light and heat will reduce strength.

**DISINFECTANT:**

First clean, then rinse with a solution of 5 oz. of 1.0% solution to 2 gallons of water for hard non-porous. For porous surfaces and surfaces difficult to clean use 15 oz. of 1.0% solution to 2 gallons of water for rinsing.
