

DIRECTIONS

BLEACH:

Dilute one gallon of LASS-O with 9 gallons of water to prepare the standard working bleach solution of 1.0%. Use product immediately.

If 1/2 of 1.0% is desired, use one gallon of LASS-O with 19 gallons of water.

DISINFECTANT:

First clean, then rinse with a solution of 5 oz. of 1.0% solution to 2 gallons of water for hard non-porous. For porous surfaces and surfaces difficult to clean use 15 oz. of 1.0% solution to 2 gallons of water for rinsing.

POOL CHLORINATION: A dosage of 8 fl. oz. of LASS-O per 1000 gallons of water (5 ppm) is recommended whenever pool is emptied and refilled. Bathers should not be allowed to enter pool until the chlorine residual falls below 3 ppm.

CHLORINE RESIDUAL MAINTENANCE: As a daily dose, add 8 fl. oz. of 10% Sodium Hypochlorite Solution for every 5,000 gals. of water, whether pool is in use or not. Since maintenance of an adequate chlorine level (0.6 to 1.0 ppm) is important in keeping a pool sanitary, the water should be tested frequently with a chlorine test kit, and the pH maintained at 7.2 to 7.6.

Degrades with age. Use a test kit and increase dosage as necessary to obtain required level of available chlorine.

LASS-O

10%

SODIUM
HYPOCHLORITE
SOLUTION

ACTIVE INGREDIENT: SODIUM HYPOCHLORITE 10%
INERT INGREDIENTS: 90%

WARNING: KEEP OUT OF REACH OF CHILDREN

STORE IN A COOL PLACE OUT OF DIRECT SUNLIGHT.
