

**This is how the
Automatic Feeder
Works**

Just Remove Label and Place Can in Sump Tank

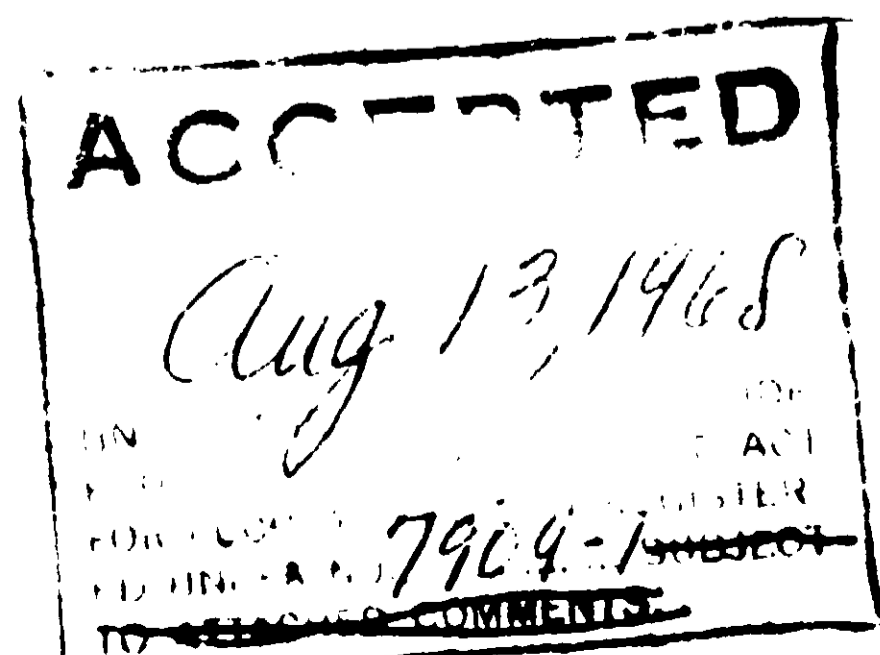

This automatic feeder is designed to give shock treatment to algae and slime. Then it maintains a killing concentration for several weeks. This method avoids the build up of immunity by algae and slime.

Ace Algaecide Briquettes should be used in conjunction with Ace Condenser Treatment Blocks.

Use Ace Condenser Cleaner to clean up a bad algae condition. Then use Ace Algaecide to prevent further growth.

ALGAECIDE BRIQUETTES IN AUTOMATIC FEEDER CAN

Patent Pending

**Kills Algae • Controls Slime Formation
Noncorrosive to Metal**

- *Remove label before using* •
- *Do Not Remove Lid* —

Algaecide feeds from lower hole in side of can

CAUTION: KEEP OUT OF REACH OF CHILDREN
SEE WARNING ON BACK PANEL

DIRECTIONS

Use one can per 25 tons or less refrigeration.

Before using remove this label from the can. Do not
remove the lid. Place can in sump tank with top up.

Algaecide feeds from lower hole in side of can.

If in bad condition, system should be cleaned out with
Ace Condenser Cleaner before using Ace Algaecide.

Use Ace Algaecide each month or as algae reappears.
Empty any content left in old can into sump tank when
recharging with new cans.

WARNING: Harmful if swallowed. Do not
breathe dust. Wash thoroughly after handling. Avoid
contact with skin, eyes or clothing. In case of swallowing,
induce vomiting by administering warm salt water (one
tablespoon per glass) or other emetic. Call a physician.
Solution will kill grass, shrubs and fish.
