### WEBFOOT MOSS KILLER & LAWN FOOD

WEBFOOT MOSS KILLER & LAWN FOOD is primarily a moss-killer. It does supply enough of the necessary nutrients for established plantings of grass to gain improved green coloring and promote additional growth.

WEBFOOT MOSS KILLER & LAWN FOOD should be applied to the complete lawn area. Applying the lawn food uniformly rather than in spot applications will result in an even growth pattern. Also will stop moss development in areas not now affected.

**NOTE: MOSS WILL TURN BLACK** — which indicates moss is dying.

A healthy turf demands complete fertilization to discourage growth of moss.

#### DIRECTIONS

1. WEBFOOT MOSS KILLER & LAWN FOOD should be applied when moss is actively growing, preferably Spring or Fall.
2. If applied during dry season water the lawn one day before application. Then apply as directed below.
3. Rake lawn thoroughly removing as much thatch and moss as possible.
4. Cut grass to approximately one-inch height and remove clippings.
5. Apply evenly by hand or spreader at rate of one pound per 100 sq. ft. (10x10 area). Bag covers 5,000 sq. ft. (50x100).
6. Always follow application with thorough watering to move WEBFOOT MOSS KILLER & LAWN FOOD off blades of grass and into the root zone.

WEBFOOT MOSS KILLER & LAWN FOOD is water soluble and may be applied by sprinkling can or sprayer. Dilute one pound in 4-gallons of water and apply to 100 sq. ft.

**CAUTION:** HARMFUL IF SWALLOWED. MAY CAUSE IRRITATION TO SKIN AND EYES. AVOID CONTACT WITH SKIN AND EYES. Be careful not to spray foliage of plants, shrubs, etc. when applying to lawn. May stain cement, stone or paint. Flush thoroughly with water immediately after exposure.
