

DIRECTIONS:

Among the weeds controlled by PYRAMIN RB are lambsquarters, pigweed, ragweed, shepherdspurse, sunweed, purslane, nightshade, mustard, henbit, smartweed and goosefoot.

Control of grass has been variable with PYRAMIN RB. If grasses are a problem, use one of the grass killers labeled for use on table beets.

Precautions:

Do not use the product on soils classified as sands or loamy sands because this may result in crop injury. Do not use pre-emergence on muck or peat soils or on soils with organic matter higher than 5% since this may result in unsatisfactory weed control.

Caution:

Do not use same spray equipment for other purposes unless thoroughly cleaned. Coarse sprays are less likely to drift. Do not store near fertilizers, seeds, insecticides or fungicides.

Do not use this product for purposes other than those recommended on this label.

Pre-Emergence Application:

Apply 4 to 5 pounds per acre of PYRAMIN RB in enough water for good coverage. Use lower rate on sandy loam soils. Spray after beet seeds are planted, but before beets and weeds emerge.

If rain does not fall within 5 to 10 days after treatment, beets should be irrigated to activate PYRAMIN RB. If irrigation is not possible, use shallow cultivation before weeds are 2 inches tall.

Early Post-Emergence Application:

Apply 5 pounds per acre of PYRAMIN RB.

Timing is very important. Observe weed growth daily. Treat after beets have 2 expanded true leaves and before any weeds have more than 2 to 4 true leaves. This is usually within 2 weeks after planting. Treatments on larger weeds will not be effective.

Pyramin RB can be used both pre- and post-emergence in the same season. Follow directions given on this label for each type of application.

Pyramin RB

Herbicide

For weed control in red table beets

A wettable powder containing
Active ingredients: _____ 75.5%
 Pyrazon (5-amino-4-chloro-2-phenyl-
 3(2H)-pyridazinone) _____ 65.0%
 Related aminochloro and
 dichlorophenyl pyridazinones _____ 10.5%
Inert ingredients _____ 24.5%

CAUTION:
KEEP OUT OF REACH OF CHILDREN.
HARMFUL IF SWALLOWED.

Avoid contact with skin, eyes and clothing. Do not reuse container. Destroy in a safe place. Do not contaminate water used for irrigation or domestic purposes.

Net Weight 5 Pounds

BASF Wyandotte Corporation

Agricultural Chemicals
Parsippany, New Jersey

Band Treatment:

When spraying a band over the row, the amount of PYRAMIN RB applied per acre is in proportion to the area actually treated.

Example:

| Beet Rows 24 inches apart & band width of: | Pounds PYRAMIN RB PER Banded Acre for Broadcast Rate of: | |
|---|---|------------|
| | 4 lbs./ A | 5 Lbs/A |
| 6-inch band | 1 Lb. | 1-1/4 Lbs. |
| 12-inch band | 2 Lbs. | 2-1/2 Lbs. |

Mixing Directions:

Use of 20 to 40 gallons of water per acre, broadcast basis, or proportionately less for banded applications.

Fill sprayer tank half-way with water. Start agitation with a mechanical or good bypass agitator. Assure adequate hydraulic agitation with a flow rate of approximately 5 gallons per minute at 40 pounds per square inch pressure. Information on a simple, low cost hydraulic system is available on request. While agitating, add the required amount of PYRAMIN RB. For more rapid and uniform wetting of this product, pour it through a 20 mesh screen (ordinary window screen) placed in the tank opening, flushing the powder through with additional water. Add water to the required volume.

Continue agitation during spraying. Mix only the amount of spray that will be used immediately.

Use 50 mesh screens in the line, and Tee-jet 8004E nozzles or larger their equivalent.

WARRANTY

NOTICE TO BUYER-Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under condition not reasonably foreseeable to seller, and buyer assumes the risk of any such use. The exclusive remedy of user or buyer and the limit of liability of BASF Corporation is the purchase price paid for the quantity of product involved.
