Basagran[®]

Post-emergence Herbicide

For Selective Weed Control in Soybeans

A soluble liquid formulation containing:

Active ingredient*

Sodium salt of bentazon*

42.0%

Inert Ingredients

58.0%

*Equivalent to 4 pounds per gallon bentazon (3-Isopropyl-1H-2,1,3-benzothiadiazin-4 (3H)-one 2,2-dioxide)

EPA Reg. Number 7969-45

WARNING! KEEP OUT OF REACH OF CHILDREN. CAUSES EYE IRRITATION. AVOID CONTACT WITH EYES. WASH THOROUGHLY AFTER HANDLING. PROLONGED OR REPEATED INHALATION OF VAPOR OR SKIN CONTACT WITH SPRAY MAY BE HARMFUL.

First Aid: If contacted, flush eyes immediately with water for at least 15 minutes. Call a physician. Harmful if swallowed.

Net Contents 1 Gallon

ENVIRONMENTAL HAZARDS

Avoid contamination of fish, stream, or ponds.
Do not apply when rain is in the forecast.
Do not apply when weather conditions favor drift from target area.

STORAGE AND DISPOSAL

Do not allow product to freeze.
Protect from moisture and frost. Avoid by storage in dry, frost-free place.
Do not store in empty container.
Empty spray equipment immediately. Do not use for other purposes. Do not store in place where disposed of in a landfill approved for pesticides or buried in a safe place away from water supply.
Try to reuse containers and dispose in incinerator or landfill approved for pesticide containers, or bury in a safe place.
Consult federal, state or local disposal authorities for approved alternative procedures such as limited open burning.

CONDITIONS OF SALE AND WARRANTY

The [directions for use of this product] reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product, including, but not limited to, ineffectiveness or other unintended consequences, such as injury to crops, fish, or other animals, or weather or conditions, production of other pests, or other adverse effects, the magnitude of which are beyond the control of BASF WYANDOTTE CORPORATION (BWC) or the seller. All such risks shall be assumed by the Buyer.

BWC warrants that this product conforms to the chemical description, and that it will be reasonably fit for the purposes referred to in the directions for use. BWC makes no other express or implied warranty of fitness or merchantability or any other express or implied warranty. In no case shall BWC or the Seller be liable for damages, including consequential damages, resulting from the use or handling of this product. BWC and the Seller make no representation and the Buyer and user accept it in respect to the foregoing conditions of sale and warranty, which may be varied only by a agreement in writing signed by a duly authorized representative of BWC.

The purchase price for BASAGRAN includes a royalty for a non-transferable license to practice the method of U.S. 3,708,877.

THE ATTACHED FOLDER GIVES COMPLETE DIRECTIONS FOR USE.

Read the entire label.

Use only as directed by label or folder.

Return empty containers of BASAGRAN to BASF WYANDOTTE before buying more. If return is not acceptable, return product at once, unopened.

For the first time, a study of the role of the nurse in the management of the patient with a mental illness has been carried out in the United Kingdom. The study was carried out in a hospital setting and was a study of the role of the nurse in the management of the patient with a mental illness.

[illegible]

Application of BASAGRAN should be made according to the recommended rate of application and the application rate should be determined according to the BASAGRAN APPLICATION RATE TABLE (Table 1).

[illegible]

the sample of 1000, and the sample size of 1000 is not large enough to make the 1000 observations independent. The sample size of 1000 is not large enough to make the 1000 observations independent. The sample size of 1000 is not large enough to make the 1000 observations independent.

Applicando il teorema di Eulero, si ha:

For example, *A. albopictus* is a mosquito that is more susceptible to low temperatures than *C. quinquefasciatus*, but *C. quinquefasciatus* is more susceptible to high temperatures and/or widely fluctuating temperatures because injury may result.

to the fact that the AASHTO training programme provided participants with a practical laboratory-based controlling environment.

Figure 6 illustrates the effect of the change in the number of firms on the effects of the change in the number of firms.

is a $\mathbb{Z}$ -module isomorphism $\phi: \mathbb{Z} \rightarrow \mathbb{Z}$ with $\phi(1) = 1$ and $\phi(2) = 2$.

For each group, DAA/AC/FAH and the other two groups were compared using a *t*-test.

1. The first group of authors (see Table 1) has been concerned with the effects of the following factors on the rate of change in the size of the population:

Figure 1. *Staphylococcus aureus* (ATCC 12228) and *Escherichia coli* (ATCC 8739) strains.

For $\epsilon \in (0, 1)$, let μ_ϵ denote the probability that $\mathbf{A} \in \mathcal{A}_\epsilon$, where $\mathcal{A}_\epsilon$ is the set of all $\mathbf{A}$ such that $\|\mathbf{A}\|_F \leq \epsilon$. Then

Weed	Percent of Total Area Covered		Percent of Total Area Covered	
	Early Stage	Mid Stage	Early Stage	Mid Stage
Hoagworts, (<i>Hieracium</i> , <i>Veronica</i>)	up to 6	1	up to 1	2
Rough stalked (<i>Acautha repens</i> , <i>Veronica</i>)	up to 4	1	up to 1	2
<i>Conium maculatum</i> (the only poisonous one)	1	1	up to 1	1
<i>Conium maculatum</i> (<i>A. repens</i> , <i>Veronica</i>)	up to 4	1	up to 1	2
<i>Veronica</i> (<i>Veronica</i>)	up to 1	1	up to 1	1
Small yellow flowers (<i>Veronica</i>)	up to 1	1	up to 1	1
<i>Veronica</i> (<i>Veronica</i>)	up to 1	1	up to 1	1
Early thistle (<i>Eryngium yuccifolium</i>)	up to 1	1	up to 1	1
Common smartweed (<i>Elygonia polygonifolia</i>)	up to 1	1	up to 1	1
Black nightshade (<i>Solanum elaeagnifolium</i>)	up to 1	1	up to 1	1
Spurred sp. (<i>Amaranthus retrofractus</i>)	up to 1	1	up to 1	1
Redroot (<i>Amaranthus retrofractus</i>)	up to 1	1	up to 1	1
Yellow marrow (<i>Hibiscus</i> , <i>transparans</i>)	up to 1	1	up to 1	1

Wild radish (<i>Raphanus sativus</i>)	up to 1	1	up to 1	1

* The most important thing is that the child is happy and healthy.

Annual morning glory (*Ipomoea* spp.):

They found that quality of life declined for patients surviving surgery, but that those who died from cancer had gained the average 10-month delay in death (the same as for those who died).

martha harley (Columbian river)

It should be noted that the proposed mechanism for the formation of the β - γ isomer of [RAC-ACETAD] polymer is different from the mechanism of the formation of the β - γ isomer of [RAC-ACETAD] polymer. The proposed mechanism for the formation of the β - γ isomer of [RAC-ACETAD] polymer is based on the fact that the β - γ isomer of [RAC-ACETAD] polymer can be formed by the β - γ isomer of [RAC-ACETAD] polymer.

Yellow not edge (*Cyrenus encrinurus*)

Late stage short-term treatment

There are three potential sources of information that can be used to support the results of a model. First, the model can be compared to empirical data. Second, the model can be compared to the results of a sensitivity analysis. Third, the model can be compared to the results of a validation study. Each of these methods has its own strengths and weaknesses, and it is important to use them in combination to support the results of a model.
