

## Supplemental Label

September 29, 1992

# Laddok<sup>®</sup>

herbicide

## RESTRICTED USE PESTICIDE

Laddok (EPA Reg No 7969-54)  
Atrazine

Tank mix with atrazine for postemergence use in corn and sorghum.

All applicable directions, restrictions, precautions and Conditions of Sale and Warranty on both EPA-registered labels are to be followed. This labeling must be in the possession of the user at the time of herbicide application.

## Directions for Use

It is a violation of Federal law to use these products in a manner inconsistent with approved labeling.

## General Information

The tank mix of Laddok<sup>®</sup> herbicide plus atrazine herbicide may be applied for postemergence control of broadleaf weeds at the proper growth stage for treatment as specified on the Laddok label. The addition of AAtrex 4L will provide residual weed control and provide suppression of giant, green and yellow foxtail.

This tank mix is effective

through contact action. Therefore, weeds must be thoroughly covered with spray. Large crop and weed canopies shelter smaller weeds and prevent adequate spray coverage.

Atrazine products compatible with Laddok include AAtrex<sup>®</sup> 4L and AAtrex<sup>®</sup> Nine-O herbicides as well as other similar generic formulations containing atrazine. Refer to the respective atrazine labels for additional directions and limitations.

## Time and Rate of Application

Apply the tank mix of Laddok plus atrazine

## Application Rate Chart for Laddok plus Atrazine

PTS/A LADDOK	LBS A/A ATRAZINE*	OIL** CONCENTRATE
2.0 pts/A	1 lb/A	1.25% v/v
2.5 pts/A	1 lb/A	1.25% v/v
3.5 pts/A	0.75 lb/A	1.25% v/v

\* See Restrictions and Limitations for maximum amounts of atrazine allowable per season.  
\*\* 1.25% v/v = 1 pt/10 gal water or 1.25 gal/100 gal of spray solution.

early postemergence when weeds are small and actively growing but before weeds reach the maximum size listed on the Laddok label. Apply the recommended amount of Laddok according to the Application Rate Chart for Laddok herbicide plus atrazine.

## Water Volume and Spray Pressure

Apply recommended rates of this tank mix as follows:

Ground equipment only: Use a minimum of 10 gallons of water per acre on a broadcast basis. Use a

minimum of 40 psi pressure (measured at the boom, not at the pump or in the line) with standard flat fan nozzles spaced 20 inches apart.

### Spray Additives

A nonphytotoxic oil concentrate (commonly referred to as oil concentrate) or Dash® spray additive should be added to the spray tank. A nitrogen solution may be substituted for oil concentrate. Nitrogen solutions which may be used are UAN or AMS. Apply UAN at a rate of 5% v/v (5 gal/100 gal of spray solution or AMS at rate of 2 1/2 lb/A).

### Restrictions and Limitations (Partial List)

Always read and follow all label directions when using any pesticide alone or in tank mix combinations. The most restrictive labeling applies when using a tank mix.

Use only on field corn and grain sorghum.

For postemergence applications, if there has been no previous soil applications to that crop, the maximum rate of atrazine from all sources is 2 pounds ai/A. If there has been a previous soil application to that crop, do not exceed a total of 2.5 lbs ai/A per calendar year.

Postemergence application to corn and sorghum must be made before corn and sorghum reach 12 inches in height.

### Conditions of Sale and Warranty

The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of

other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. All such risks shall be assumed by the Buyer. BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to above. **BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. IN NO CASE SHALL BASF OR THE SELLER BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.** BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
