Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 7969-79**Blazer**[®]
herbicide**For postemergence use on soybeans and peanuts to control eclipta.****Blazer EPA Reg. No 7969-79**

All applicable directions, restrictions, precautions and Conditions of Sale and Warranty on the EPA-registered label are to be followed. This labeling must be in the possession of the user at the time of herbicide application.

Directions For Use

It is a violation of federal law to use this product in a manner inconsistent with approved labeling.

General Information

Blazer[®] herbicide can be used on soybeans and peanuts to control eclipta. **Blazer** is effective mainly through contact action, therefore, weeds must be thoroughly covered with spray. Large crop-and-weed leaf canopies shelter smaller weeds and prevent adequate spray coverage.

Time and Rate of Application

The rates of application and weed sizes for the use of **Blazer** to control eclipta are given in **Table 1**. Apply 1.5 pints of **Blazer** plus 1 quart of crop oil concentrate per acre.

To control eclipta, **Blazer** must be applied to eclipta plants while they are very small. The recommended weed size for these early postemergence applications is 1/2"-2" in height, and fewer than 6 true leaves.

If application to small weeds is not possible, eclipta suppression may be obtained with a late postemergence application of **Blazer** when the eclipta plant is 2-6" and has 6-12 true leaves.

Suppression should not be expected if eclipta is larger than 6" or has more than 12 leaves at application time.

Water Volume and Spray Pressure

Apply recommended rates of **Blazer** as follows:

Ground Equipment:

Broadcast Application: Use a minimum of 20 gallons of water per acre on a broadcast basis. Use flat fan nozzles with a minimum of 40 psi (measured at the boom, not at the pump or in the line). Do not use flood, hollow cone, whirl chamber, or controlled droplet application (CDA) nozzles.

Air Equipment: Use a minimum of 5 gallons of water per acre. Consult the respective labels for special directions for aerial applications.

Restrictions and Limitations

Do not apply more than 2 pints per acre of **Blazer** per growing season. Do not apply more than a total of 1.5 pints of **Blazer** per acre per application.

In the case of crop failure, only peanuts or soybeans may be immediately replanted.

Do not use treated plants for feed or forage.

Allow a minimum of 15 days between sequential applications of **Blazer**.

Peanuts Only:

Do not apply **Blazer** within 75 days of peanut harvest.

Soybeans Only:

Do not apply **Blazer** within 50 days of harvest for soybeans.

Crop Rotation Restriction: Root crops (such as carrots, turnips, sweet potatoes, etc.) must not be planted in fields treated with **Blazer** for a period of 18 months following treatment.

Table 1. Blazer Rate and Timing Information for Eclipta Management in Soybeans and Peanuts

Effect	Blazer Rate Per Acre	Oil Concentrate Rate Per Acre	Weed Height	Leaf Stage
Control	1.5 pints	1 quart	< 2"	<6
Suppression	1.5 pints	1 quart	2-6"	6-12

Condition of Sale and Warranty

The **Directions For Use** of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result, because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. All such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above. BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR OTHER EXPRESS OR IMPLIED WARRANTY. IN NO CASE SHALL BASF OR THE SELLER BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing **Conditions of Sale and Warranty** which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
