MAY 9 1997

Dear Dr. Bryant:

Subject: WEEDMASTER Herbicide
 EPA Registration No. 7969-133
 Application and Letter Dated April 17, 1997, Request
 for Supplemental Labeling To Extend Spot Treatment
 Directions for Use

The proposed supplemental labeling submitted with the
 subject application has been reviewed and found acceptable
 under the Federal Insecticide, Fungicide and Rodenticide
 Act as amended, provided that you:

- o Submit one (1) copy of the final printed supplemental label
 before you release the product for shipment under this
 label.

If this condition is not complied with, the registration
 will be subject to cancellation in accordance with FIFRA,
 section 6(e). Your release for shipment of the product
 under this label constitutes acceptance of this condition.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Joanne I. Miller
 Product Manager (23)
 Herbicide Branch
 Registration Division (7505C)

WEEMASTER® HERBICIDE

SUPPLEMENTAL LABELING For WEEDMASTER® Herbicide

Spot Application in Pastures (Including pasture for hay), Fencerows, and
General Farmstead (Non-cropland only)

EPA Reg. No. 7969-133

All label restrictions and Directions for Use of WEEDMASTER HERBICIDE
apply.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with
its labeling.

Important

Before using this product, read and carefully observe all applicable directions,
restrictions, and precautionary statements on the EPA-registered container label
and the WEEDMASTER® HERBICIDE Directions for Use booklet attached to the
container.

Spot Application in Pastures (Including pasture for hay), Fencerows, and
General Farmstead (Non-cropland only)

WEEDMASTER may be applied using water or oil and water emulsions in spot
application to control undesirable vegetation using handgun or similar types of
application equipment. Before using, read and follow grazing and feeding
restrictions in the WEEDMASTER directions for use booklet that accompanies
this product.

To prepare oil and water emulsions, mix in the following order: water, emulsifier,
chemical and oil. Mix in the following recommended proportions (also see
Dormant Basal Treatment below):

Total mix (gal)	Water (gal)	Emulsifier* (oz)	Weedmaster (pt)	Diesel (gal)
10	8.75	1.5	2.0	1.0
50	43.75	7.5	10.0	5.0
100	87.5	15.0	20.0	10.0

* Some emulsifiers are more effective than others. Mixture should remain milky colored without oily layer on top when under agitation. If oily layer forms, increase the amount of emulsifier or change to a more effective emulsifier.

Do not exceed 40 gallons of spray solution per treated acre per application. Forty gallons of spray solution contains 1.0 lb ae dicamba and 2.87 lb ae 2,4-D. Spray individual plants to wet. Do not allow this spray mixture to come in contact with desirable vegetation.

For Spraying Foliar Applications

1. Spray when leaves have reached full size but have not hardened due to drought or maturity.
2. Spray individual plants to wet with handgun.
3. For larger stems (up to 3" in diameter) and hard to control species, direct spray stream to base of stems to wet the stem at soil surface in addition to wetting the foliage.
4. Do not apply under drip line of desirable trees or adjacent to desirable vegetation.

For Dormant Basal Applications

1. Increase diesel content to 15% or 15 gallons/100 gallons of total mixture.
2. Spray in late winter and early spring before plants break dormancy.
3. Spray the bottom 24" of stem to wet on all sides.
4. For larger stems (up to 3" in diameter) and hard to kill species, direct spray solution to base of stems to wet the soil at the stem/soil junction in addition to wetting the stem.
5. Do not apply under drip line of desirable trees or adjacent to desirable vegetation.

THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF APPLICATION.
