

# Frontier® 6.0

herbicide

**Fall applications for weed control in corn and soybeans in North Dakota, South Dakota, Minnesota, Wisconsin, Iowa, north of Highway 136 in Illinois and north of Highway 91 in Nebraska**

EPA Reg. No. 7969-147

All applicable directions, restrictions, precautions and **Conditions of Sale and Warranty** on the EPA-registered label are to be followed. This labeling must be in the possession of the user at the time of herbicide application.

**Directions For Use**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Read the precautionary statement, **Environmental Hazards, Storage and Disposal** statements, and **Conditions of Sale and Warranty** statement appearing on the container label.

**Application Directions**

All label precautions and restrictions found in the **Directions For Use** booklet concerning field corn and soybean, including **General Information, Use Methods and Timing, Mixing, and Application** apply for this added application timing.

**Frontier 6.0® Herbicide Fall Application Use Programs**

**Frontier 6.0** may be used in a fall application for weed control in minimum-tillage or no-tillage corn or soybean production systems planted the following spring. Applications of 32 fluid ounces per acre may be made to medium- and fine-textured soils with greater than 2.5% organic matter. Fall applications must be made after October 1. Apply **Frontier 6.0** in the fall after crop harvest when soil temperatures at the 4" depth are sustained at less than 55° F and before the ground freezes. Tillage operations may be conducted before or after applying **Frontier 6.0**. If following an application, tillage should be no more than 2-3" deep to uniformly incorporate the herbicide into the upper soil surface.

If a sequential application program (fall application followed by spring application of **Frontier 6.0**) is used, the maximum combined rate of **Frontier 6.0** that may be applied is 32 fluid ounces per acre per crop season.
