**HOUSE & GARDEN
INSECT KILLER**

FOR USE AS AN AREA SPRAY OUTDOORS

For Use as an Area Spray
To Kill House Fly and Mosquito Larvae
Spray only when air is still. Spray continuously from 8 to 10 feet. Follow the directions on the label. Hold container 12 to 24 inches from plants, flowers and shrubs. Spray these areas with a slow sweeping motion at the rate of 1 to 2 seconds per each yard of space while moving away from treated area. Treat open areas 1 to 2 times per season. Allow spray to settle before reentering the treated area.
