### USE AND APPLICATION

HELENA ENDRIN 1.6-E is suitable for use in conventional hydraulic sprayers, low-volume ground applicators, and airplane sprayers. Use this product only for recommended purposes and at recommended dosages. For best results consult the State Agricultural Extension Service. For airplane application use at least 3 to 10 gallons of water per acre.

Avoid drift of this product to any crop for which it is not registered or to any crop for which its use may be registered but application would be closer to harvest than recommended.

Mix HELENA ENDRIN 1.6-E with water by agitation or by circulating the mixture through the spray pump and back into the tank. A proper water mixture will have the appearance of a milky emulsion with no free oil on the surface. Agitate before use until a uniform milky emulsion is formed. Agitation is also necessary when mixing with oil.

NOTE: A precipitate may deposit in cold weather. In such case, warm gently and agitate until redissolved before using.

### FIELD CROPS

Pests for Which This Product May Be Applied — This product may be applied only to control the sugarcane beetle.

**SUGARCANE:** For control of sugarcane beetles, use 2 1/2 pt. per acre. Apply on cane seed pieces in open furrow at time of planting in fall. Make 4 applications at 21 day intervals as specified by State Extension Service Specialists.

**APPLICATION RESTRICTIONS** — Apply only with low pressure ground equipment. Cover furrows with soil promptly after application.
