#### DIRECTIONS FOR USE

#### GENERAL CLASSIFICATION

HI-LO RABON MINERAL BLOCK is a feed supplement for cattle. It is not effective against existing adult flies. When starting a feeding program during the fly season, it may be necessary to combine it with other measures to reduce the population of existing adult flies. Supplemental fly control measures may be needed in and around cattle, its and buildings to control stable flies and stable flies which can breed indoors in cattle manure and in other areas of vegetable matter in the age on the premises. HI-LO RABON MINERAL BLOCK should be used in conjunction with other good management and sanitation practices. Many flies should be placed near watering and feeding areas, preferably up the front and protected from the rain.
