

**PYRETHROID INSECT SPRAY**  
(OIL BASE CONCENTRATE )

Net Weight \_\_\_\_\_

Use in: Bakeries, Food Plants, Restaurants, Schools, Hotels, Motels  
Office Buildings, Hospitals and Food Handling Plants

Active Ingredients:

|                                                                                          |                 |
|------------------------------------------------------------------------------------------|-----------------|
| 5-(2-methyl-3-furyl)methyl 2,2-dimethyl-3-(2-methylpropenyl)cyclopropanecarboxylate..... | 3.000% w/w      |
| Related Compounds.....                                                                   | 0.409%          |
| Aromatic petroleum hydrocarbons.....                                                     | 3.971%          |
| Petroleum distillate.....                                                                | 92.500%         |
| Inert Ingredients.....                                                                   | 0.120%          |
|                                                                                          | <u>100.000%</u> |

cis/trans isomers ratio max. 30% (+) cis and min. 70% (+) trans.  
U.S. Patent No. 3,445,007.

**CAUTION**

**KEEP OUT OF REACH OF CHILDREN**

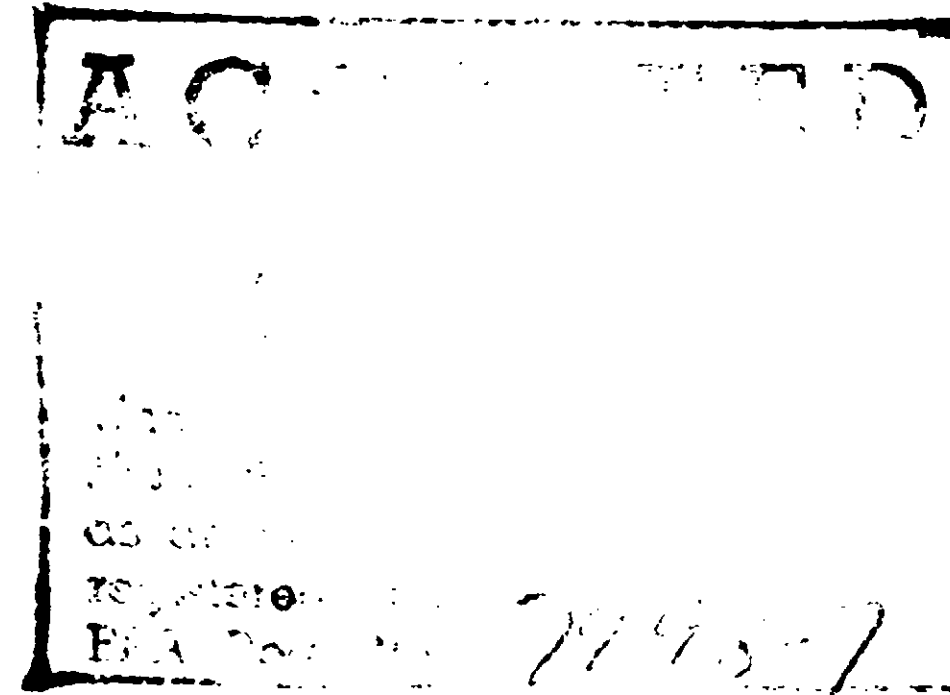

Avoid if swallowed. DO NOT USE, POUR, SPILL OR  
STORE NEAR HEAT OR OPEN FLAME. Avoid contamination  
of feed and foodstuff. Use in food processing  
plants only when the plant is not in operation.  
Foods should be removed or covered during treatment.  
All food processing surfaces should be covered or  
thoroughly cleaned before using. In hospitals,  
patients should be removed from room prior to  
treatment. Room should be ventilated for 2 hours  
after treatment. Do not return patients to room  
until after ventilation.

Remove pets, birds and cover fish aquariums before  
spraying.

**DONT INER DIS CAL:** Do not reuse empty container. Destroy  
it by perforating or crushing. Bury or discard  
in a safe place away from water supplies.

Manufactured by  
Chemix Corporation  
1141 108th St  
Arlington, Texas 76011

EP Reg. No. **7998-7**  
EP Est. No. 7998 EX01

For HOUSEFLIES, MOSQUITOES  
Point nozzle upward, especially windows and  
corners. Fill the room and  
the room closed for a few minutes.  
treatment is complete.

WASPS: Application should be made when  
are at rest. Spray in cracks and  
tactically as many insects as possible.

FOR CRAWLING INSECTS: Apply to  
spiders and centipedes in  
as cracks, crevices, under  
under refrigerators, and  
on insects where possible.

ANTS: Spray trails, and  
possible. Repeat as necessary.

For most effective results, use  
sprayer adjusted to deliver  
either 0.10% or 0.25% solution.

For crawling insects, use  
spray particles and use  
SPRAY.

Dilute to 0.5% PYRETHROID  
weight of the 3.0% concentrate.

Dilute to 0.25% by adding  
concentrate to 11 parts water.

Dilute to 0.10% PYRETHROID  
for flying insects of the  
3.0% concentrate to 10 parts water.

Dilute to 0.20% by adding  
concentrate to 14 parts water.

## DIRECTIONS FOR USE

For HOUSEFLIES, MOSQUITOS, AND GNATS: Close all doors and windows. Point nozzle upward, direct the spray mist to all parts of the room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

WASPS: Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat as necessary.

FOR CRAWLING INSECTS: Roaches, earwigs, grain mites, sowbugs, spiders and centipedes: Spray thoroughly into hiding places such as cracks, crevices, moist areas, opening around pipes and sinks, under refrigerators, baseboards, and storage areas. Spray directly on insects where possible.

ANTS: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

For most effective results against flying insects use in a good sprayer adjusted to deliver a fine mist. For flying insects use either 0.10% or 0.25% PYRETHROID INSECT SPRAY.

For crawling insects adjust spray to produce large wetting type spray particles and use either 0.25% or 0.50% PYRETHROID INSECT SPRAY.

## DILUTING INSTRUCTIONS

Dilute to 0.5% PYRETHROID INSECT SPRAY BY adding 1 part by weight of the 3.0% concentrate to 5 parts of petroleum distillate.

Dilute to 0.25% by adding 1 part by weight of the 3.0% concentrate to 11 parts of petroleum distillate.

Dilute to 0.10% PYRETHROID INSECT SPRAY (which would be used for flying insects only) by adding 1 part by weight of the 3.0% concentrate to 29 parts of petroleum distillate.

Dilute to 0.20% by adding 1 part by weight of the 3.0% concentrate to 14 parts of petroleum distillate.
