SPRAYER

JUST HOOK-ON  
and LEAVE ROOM

NO KEROSENE ODOR

SAFEGUARD Brand household insect killer may be used anywhere in the home, but food and food containers should be protected from contamination. Remove pet birds and other small animals before spraying. Apply this product only as directed on the label.

GENERAL DIRECTIONS

Close doors and windows and turn off fans and air conditioners. Cover exposed foods, utensils, and food handling surfaces. Open cabinets and doors to expose spaces to be treated. Extinguish all flames, except pilot lights and relief valves, and turn away from pilot lights. For best results, leave treated space and closed for two hours or more. Do not remain in treated area. After treatment open doors and windows and allow to ventilate for 30 minutes. If operated manually, do not use as a total release aerosol.

AS A TOTAL RELEASE AEROSOL

**To Kill Roaches, Flies, Mosquitoes, Gnats, Wasps, Hornets, Small Flying Moths:** Hold can upright and away from you. Push sprayhead until tip engages rim of valve, pointing the cap. Valve will remain in open position for total release of contents. Place can upright position on a stand or table. Place paper under can to protect surface immediately around area of release. Release the contents of the can from a 6-foot radius of unobstructed space. Use additional units to cover the whole room. Free flow of fog is not assured.

AS AN AEROSOL INSECTICIDE

**To Kill Flies, Mosquitoes, Gnats, Wasps, Hornets, Small Flying Moths:** If operated manually, do not use as a total release aerosol. Close all doors and windows. Spray about 15 minutes for every room. It is not essential to shut flying insects, they will die as they fly through it. For roaches and wasps, double the above dosage. Sweep up and destroy them when they appear. Repeat treatment as necessary.

**To Kill Roaches, Ants, Silverfish, Waterbugs, Spiders:** Spray hidden places, such as baseboards, cracks, crevices, pipes, and joints and pipes, under carpet, and refrigerator. Think of all cracks and around window frames and ant trails. Spray directly on insects when possible. Repeat as needed.

**To Kill Bedbugs:** Use gentle bed spray method. Spray mattress and bed frames. For those that cannot be reached, spray directly on pillow and repeat application every 2-3 days.

**To Kill Fleas:** Liberally spray from ceiling down on walls and corners, along top quarter of furniture, under furniture, and other areas where pet animals habitually rest. Repeat application every 2-3 days to insure contact with eggs.

**WARNING:** Contents under pressure. Do not use if can is damaged or if the metal is hot. Do not use if you are pregnant or have a child in the house. Do not use if you are allergic to pyrethrin. Do not use if you are allergic to petroleum distillates.
