Carry's Liquid Star, Snail & Insect Killer is a convenient, ready-to-use liquid bait. It is extremely effective in the control of slugs, snails, earwigs, earwings, centipedes, crickets, grasshoppers, ants, armyworms, millipedes, pillbugs and darkling beetles. Easy to use, quick, clean and economical. Carry's Liquid Star, Snail & Insect Killer resists rain and sprinkling and remains effective in the garden for many days.

**DIRECTIONS FOR USE:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**To Apply:** Space apart and squeeze drops of bait 4-6 inches apart on soil in area to be treated. The bait is extremely attractive to slugs, snails and other listed insects and will lure them from their hiding places. All likely places should be treated as slugs, snails, and other listed insects travel. They travel damp, well shaded locations where they can obtain shelter by day. Be sure areas to be treated is damp. To dry weather, water areas well before applying bait. Preferred baiting time is in the evening as these pests feed mainly at night. Normally apply bait every two weeks until infestation is under control. Heavy or prolonged rain can shorten effective period of bait. Use more frequently under those conditions. Use approximately 24 oz per 400 square feet.

**Special Notes:** If slugs, snails and other listed insects are avoiding from adjacent properties, a pencil-thin line the entire length of the infested area will form a barrier and result in successive control.

\*Carry's Liquid Star, Snail & Insect killer can be used to protect ornamental plants, flower gardens, dianthus and herb lamps, and fruit and vegetable plants. When protecting fruit and vegetable plants, treat area around plants and between rows. Do not apply to foliage or edible parts of crop. Protect the following fruit and vegetable plants: apples, beans, cabbage, carrots, celery, cucumbers, lettuce, onions, peas, peas, peppers, potatoes, radishes, spinach, squash, tomatoes, turnips, apples, avocados, blackberries, cherries, citrus, grapes, peaches, plums, and strawberries.

**TIPS:** When dispensing bait, occasionally tip bottle upright to be refilled with air when bottle is almost empty. Add three tablespoons of water, shake vigorously then continue to apply. If spray becomes clogged, tilt spray and clear with toothpick.

**STORAGE:** Store in original bottle, in a cool, shaded location protected from direct sunlight and freezing temperatures. Avoid contamination of food and household.

**DISPOSAL:** Soak up original container in several layers of newspaper and discard in trash - do not reuse bottle. Rinse thoroughly before discarding in trash.

**PIC CARTOONERY STATEMENTS**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:**

Causes eye irritation. May be harmful if swallowed. Avoid breathing vapor. Avoid contact with skin, eyes, or clothing. Wash thoroughly after use. Keep out of reach of children and domestic animals. Do not allow children or pets to contact treated areas. This product may be fatal to dogs or other pets if eaten. Keep pets out of treated areas. Do not apply to forage or other plant parts.

**STATEMENT OF PRACTICAL TREATMENT**

If swallowed: Call a physician or poison control center. Drink 2 to 3 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting if anything by mouth is an unconscious person. If on skin: Wash thoroughly with soap and water. If in eyes: Flush with plenty of fresh water. NOTE TO PHYSICIANS: Carbaryl is a moderately reversible cholinesterase inhibitor. Atropine is antidote.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to aquatic and estuarine organisms. Do not apply directly to water or wetlands (streams, bogs, marshes, and ponds). Do not contaminate water when disposing of equipment washwaters.
